Case ID #: [redacted] (U) Observation of UAP by Anoka Police Department personnel

Synopsis: (U) Observation of UAP by Anoka Police Department personnel

Administrative Notes: (U) Generated by Guardian

Package Copy: (U) Generated by Guardian

Details:

1843(a)(3)

On 02/19/2025, at approximately 1:17am, Anoka Police Department [redacted] and two other Anoka PD employees observed a UAP near the western horizon. The skies were clear and the observation lasted for approximately 90 minutes in total. The witnesses used binoculars to get a better view of the object. The UAP appeared to be at an altitude of 10K - 30K feet and potentially 50 miles away, at one point during the observation. The UAP exhibited unusual, rapidly changing "tie-dye" multi-color lighting which was inconsistent with known aircraft lights. The UAP also exhibited rapid movement, and appeared to travel 30-40 miles in a few seconds with a movement that "skipped across the sky like a stone", inconsistent with known aircraft flight or satellite observations. The object may have flown near the location of the Monticello Nuclear Power Generation Plant. The object was further described as appearing similar to an orbital diagram of an atom, with six "hula-hoops with lights around each loop".
