NNNN

1. Object disappeared in same location it when 1st sighted, yet object supposedly moved.

2. Time of sighting is given as two different times; doesn't say whether obj sighted twice or whether time of sighting was between times reported.

3. Observer states weather "VERY CLEAR, NO WINDS"; weather reports indicate a surface wind of 10 knots, thunderstorms in all areas of sighting with 8 cloud coverage at 12,000'.

The above is inconsistent info; however, observer probably saw an A/C light. Obs. location is approx 15 miles SW of Radio range for Indian Springs and Las Vegas, which has heavy air traffic.
