San Francisco, Cal.

June 28, 964.

322-I4th. St.

To; General D.Iisenhour;
My Dear Sir;

On May 24th. I wrote you a letter, and I know you are a very busy man but I am sure you would have answered by now if you had received the letter. I addressed it to Valley Forge as I still do not know your address.

My reason for writeing you is imporant to me as I am trying to decide in my own mind if there are flying saucers. and if you Veify what a womwan said over a radio station then I will be able to believe in them.

Some woman called in a radio station and said that while you were President you were taken to some hangar and were shown a flying saucer and that you had gone aboard etc. Now that seems far fetched to me as I am sure some of it would have gotten into the press as we do n ot keep that much from the general public. Do we??

When you had your heart attack I prayed for your recovery and the whole world was so glad of your recovery and you are still consulted for your knowledge in imporant things. This may not seem imporant to you at all but if you tell me you have had that experience then I can believe. She came to the radio station and made this statement as the radio disc jockey was not too sure that he could believe it when she first called in. It was our local CBS and Al Douglas was in charge of the program.

I would appreciate it so much if this does come to your attention and that you can find time to answer me.

Respt. Yours, Ira B. Daniels.

Dear Mrs. Daniels:

In response to your letter of June 28th, may I say there is no basis in fact to the alleged story that you state was given over a local radio station. I might add, if it relates to some other instance that, of course, would be another matter.

Thank you for your interest in writing,

Sincerely,

ROBERT L. SCHULZ
