General Dwight D. Eisenhower
Gettysburg, Pennsylvania

Dear General Eisenhower:

As a journalism class, we are encouraged to read and discuss current events.

We ran across this enclosed article which appeared in the October 18, 1965 edition of the San Francisco Chronicle.

We are wondering if there is any truth in the article's statement that you entered the spacecraft which landed at Edward's Air Force Base.

Although we realize that some information is classified and cannot be revealed to the general public, we would like to know if you can give us any confirmation of the matter.

Thank you for your consideration.

Sincerely,

Bobbe Richtel

A DRAWING OF THE
COSMIC POWER TEMPLE

Martians don't want the earth's axis to slip

Class at UC Gets Word From Mars

By Donovan Bess

The University of California at Berkeley showed again yesterday how big it can be.

It opened its distinguished portals to Della Lee Larson, president of the Oakland Space-Craft Club, who has inside information on the people from Mars and Venus and why they insist on trying to protect the earth.

UC students learned how, only this year, a

spacecraft landed at Edwards Air Force Base, and that former President Eisenhower came over from Palm Springs and "was taken aboard."

"Mr. Eisenhower was told to keep quiet about what he saw," she said, explaining why the general never held a press conference on the subject.

Mrs. Larson also disclosed plans for a temple to be built in Hollywood, for the purpose of "collecting cosmic power so as to prevent further slipping of the earth's axis."

"Why in Hollywood?" asked a student.

"Los Angeles is one of the danger spots," she replied. "Dear, you must already know that."

This new UC breakthrough came in three sections of Dr. Ernest Becker's Sociology 30 class. His students heard Mrs. Larson on invitation of a section leader, H. Taylor Buckner, a research sociologist.

MARS' CHIEF

Buckner has studied the Oakland flying saucer movement for the past four years. He attended more than 30 of the club meetings and three regional space-craft conven-

'Help From Mars'

This photograph was shown to University of California sociology students by Della Lee Larson, as documentation of her lecture on the movements and plans of Martians and other cosmic people. She said the picture was taken on October 10, 1956, with a Polaroid camera. One reason such spacecraft have come to the Bay Area, she said, is to "melt down the San Andreas fault" and save us from slipping into the ocean.

"Los Angeles is one of the danger spots," she replied. "Dear, you must already know that."

This new UC breakthrough came in three sections of Dr. Ernest Becker's Sociology 30 class. His students heard Mrs. Larson on invitation of a section leader, H. Taylor Buckner, a research sociologist.

MARS' CHIEF

Buckner has studied the Oakland flying saucer movement for the past four years. He attended more than 30 of the club meetings and three regional space-craft conventions.

"I wanted the students to see a well-elaborated deviant belief system," he said.

Most of Mrs. Larson's information comes from private contacts with the governmental head of Mars who, she said, is named Monka. He does not like the way we keep having wars down here and, with the help of expedition leaders, he hopes to make us match the high-minded Martian way of life.

COMMUNICATION

"How do you communicate with Monka?" asked a student.

"He chooses a moment," replied the space leader, "when I'm quiet and relaxed. I hear his voice in the middle of my head."

The lecture began on a low key, as Mrs. Larson explained "the laws that govern the entire universe." She asked the students to retain "an open mind"—confessing that "there has been so much propaganda against our work."

The students listened in sober attention as she revealed that:

Each Martian spacecraft is equipped with a "vocalator—a machine that is something like our TV, I'd say, and it translates our language into sound and color."

The outer space people have organized "what they call the Interplanetary Federation, which is based on Saturn, and is very much like our United Nations."

On Mars "they have no jails, no hospitals, and no crime to speak of, although there are minor offenses which all can be taken care of by counseling."

The Martians "have no money, and the production and distribution is made according to the needs of all the people."

About 45,600 years ago, outer-space people brought two huge "mother ships" over a pyramid in Egypt and installed a generator under its base. It has been kept active by the North Star. This was done because during the glacial period too much ice collected at the North Pole and the weight made the earth's axis slip 12 degrees—requiring remedial action.

Dear Miss Richtel:

RLS/fmg

The General is out of the office at the present time, but I know that he would want me to respond to the inquiry concerning statements made by Della Lee Larson.

It would seem to me that in your research it would be best to first determine whether or not a craft such as you describe did indeed arrive at the announced location. Did Miss Larson indicate the actual date on which this event took place?

Sincerely,

ROBERT L. SCHULZ
