The Dwight D. Eisenhower Library

Dear President Eisenhower,

This organization is writing this letter to inform you about a subject which we think you should know about and this subject is on "Flying Saucers", I use this for lack of a better term. You may be informed on the subject and can't do anything about it if so we think in the near future the people of the United States are going to ~~quite~~ stop listening to the Air Force's changeable ideas on this subject and there is going to be trouble!

We have been reading quite a few informative books and fine literature on this subject and we have come to the conclusion that the governemnt is going corrupt in the Air Force and other branches and that the rights or freedoms of speech and freedom of the press are being ~~revoked from~~ the people. The American people are suppose to be the most informed people about all matters in the world. If there are people trying to contact us from other planets why not inform the world, its going to break sooner or latter and we don't think you would want a messy situation when information is given out. We and a number of other people know there is something definitely going on so would you please give it some thought. Its about the world and universe so it must be important enough to discuss.

If you have any comment we welcome it, please.

Thank you very, very much.

Yours truly,

William N. Horn
and Club
