Bourke B. Hickenlooper Papers

31-bbh-sencom-b07-f09

U.F.O.

January 29, 1965

Honorable Bourke Hickenlooper
Senator of Iowa
Senate Office Building
Washington, D. C.

RECD FEB 1 1965

Dear Senator Hickenlooper:

Have you read the U. F. O. Evidence Report? If not, I urge you to read it as soon as you can!

I am currently an associate member of the N. I. C. A. P. which is a committee that has published this report and which investigates all reports of U. F. O. as thoroughly as possible.

The committee has passed out U. F. O. Evidence Reports to each Senator and Congressman to examine, so I am sure you have received one.

I am asking you to help us try and get a hearing on the Report as soon as possible. The reason for the hearing is to get all aspects of the Report and the Air Force files aired in order to prevent an accidental war, which may be possible with the number of sightings on radar being high. Therefore, I urge you to read it with an open mind considering all possibilities of visitors from outer space, which is not impossible, because someday we will be visiting other planets.

After you have read the Report thoroughly, please let N. I. C. A. P. know how you may help in getting a hearing on the Report.

Sincerely yours,

Michael J. Canny
