Depart of the
United States Airforce
Washington, D.C

Dear Sir:

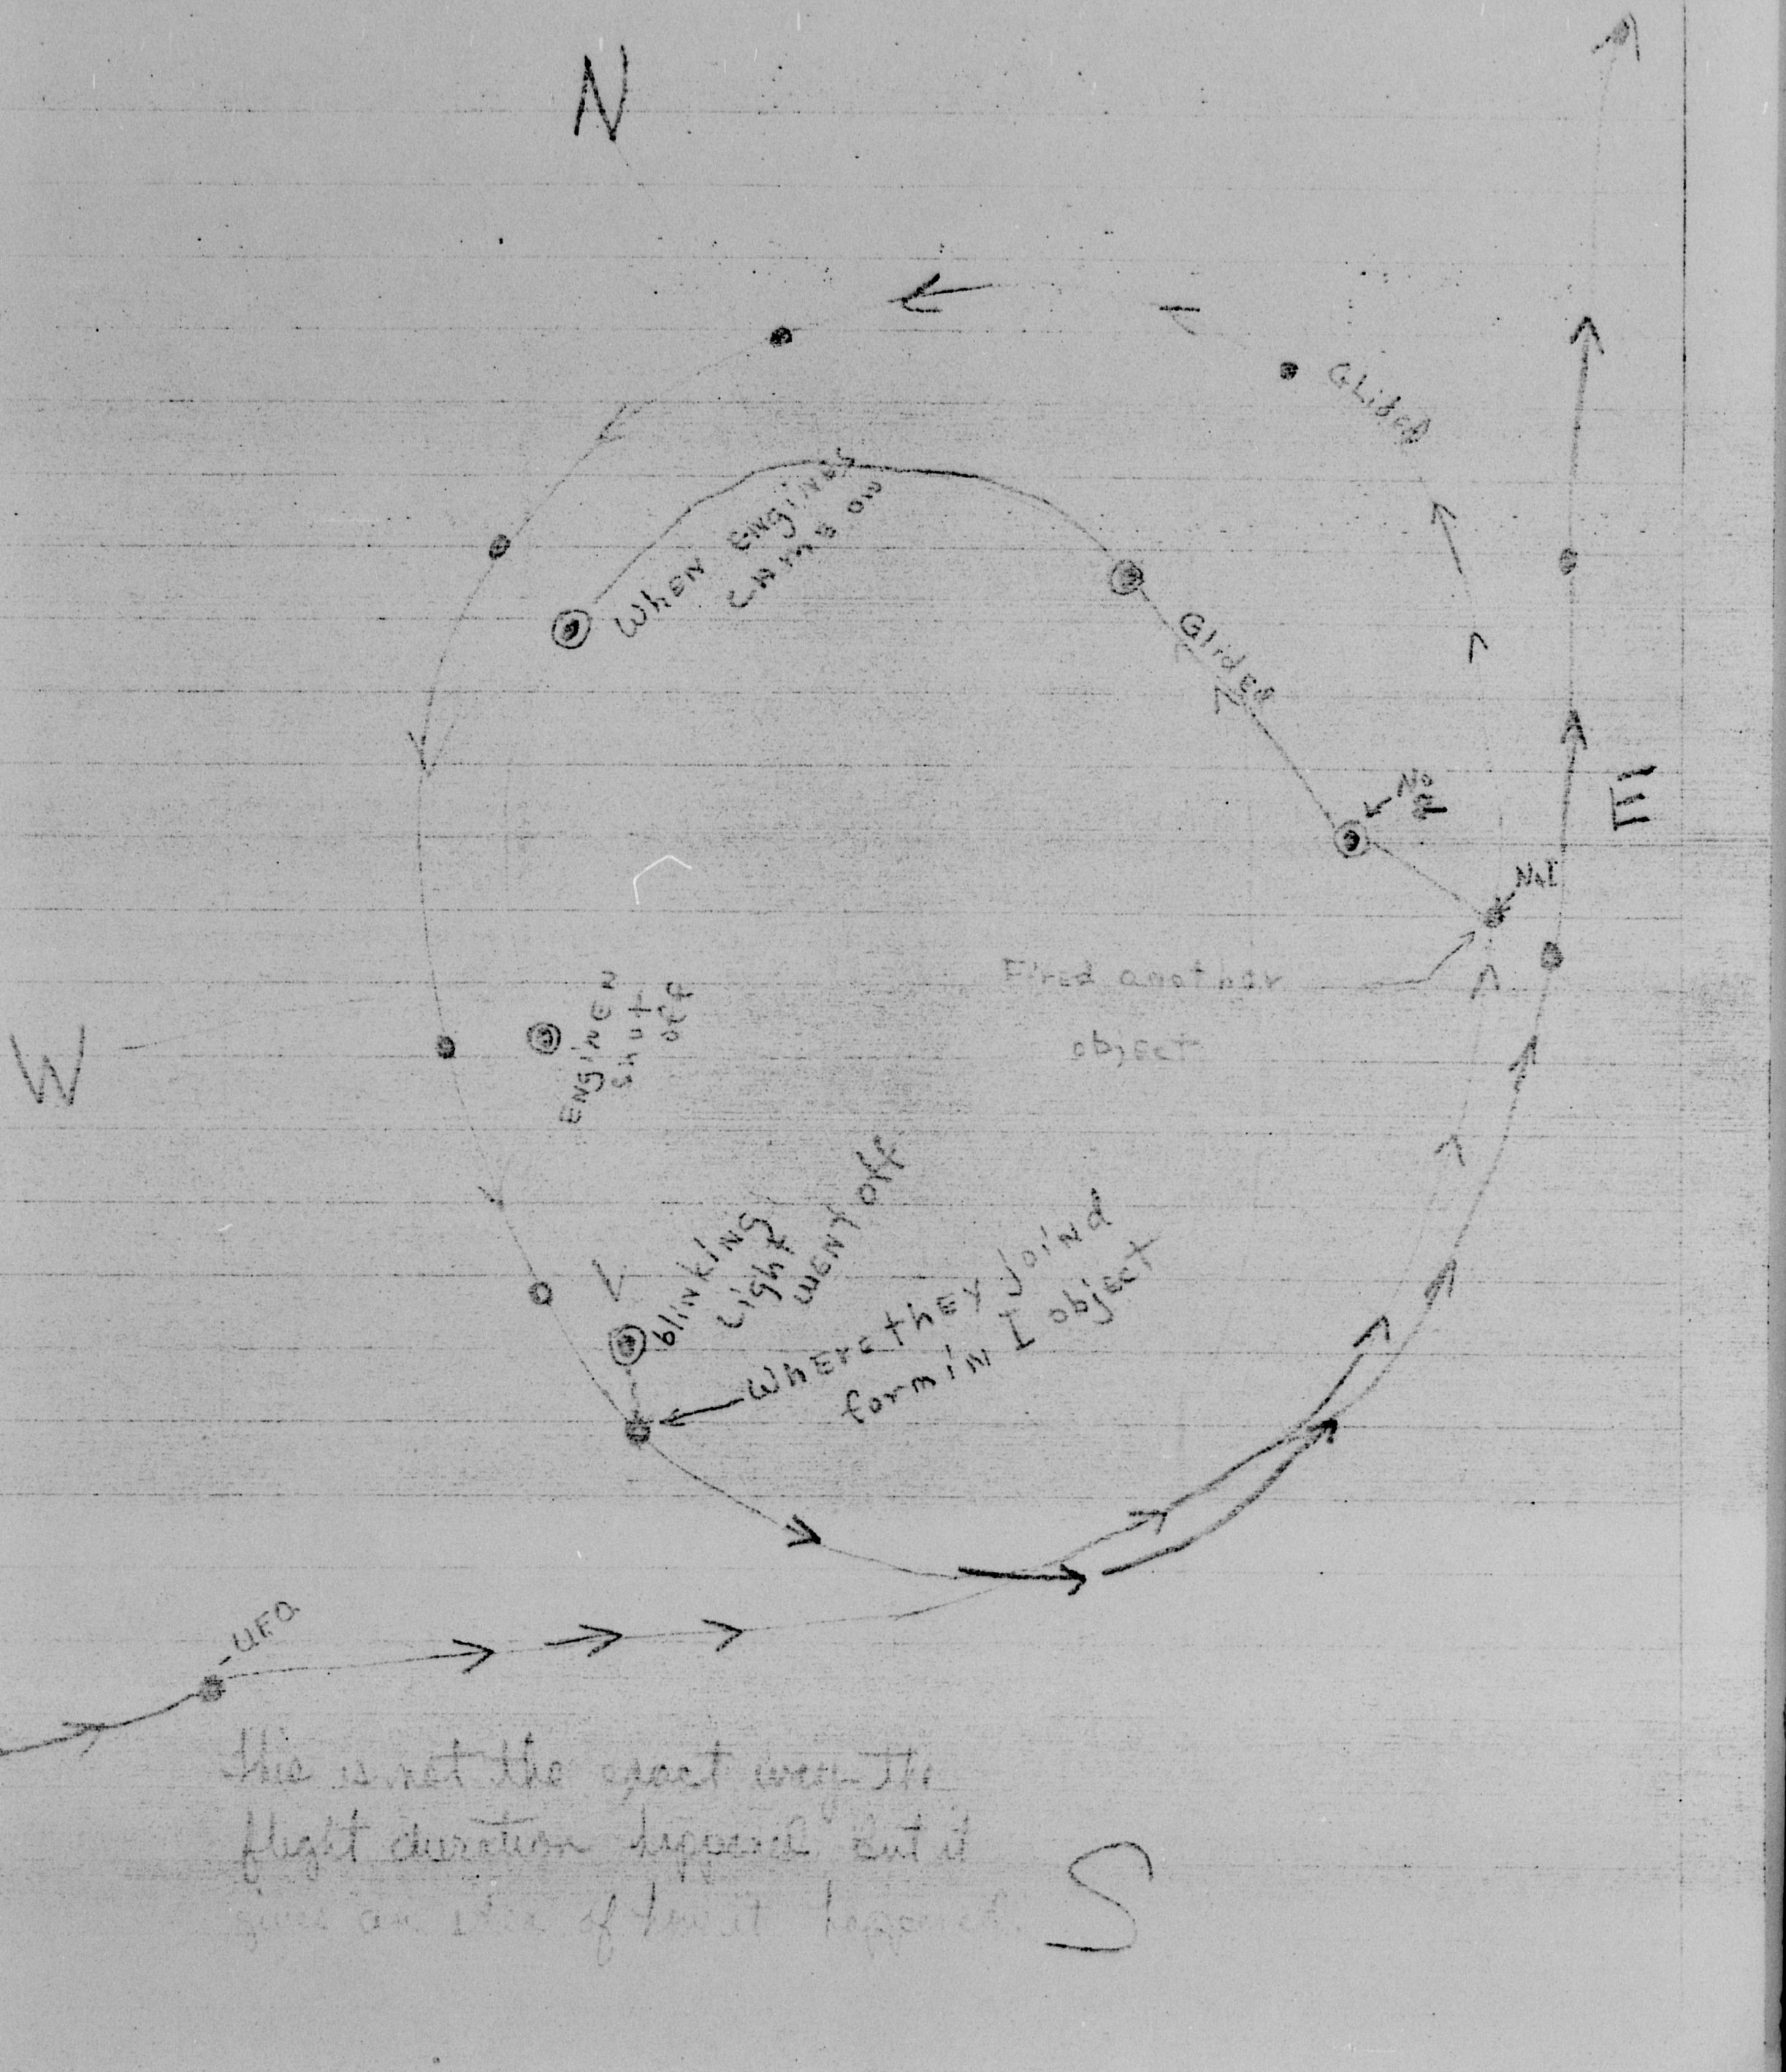
I am a freshman in El Campo High and I along with other friends have been keeping Data on UFOs So I want I like to know a little information about a certain aircraft if it exist and is possessed by the Air Force.

On Oct. 4, 1965 I spotted a blinking red and white object in the sky. It had no exhaust vapor or any type of engine running noise over it was traveling in a circular pattern and when it completed about 1/3 of the circle it fired another blinking light from the left side forming two objects then as they completed the circle their engines came on for about 2 minutes and then went out and they glided in the circular pattern and came together and as the blinking light that was fired from the side flamed out in the other and only one object could be seen So what I want to know is

I got on my records if that object was an
U.S. Force aircraft or an U.F.O. If any
writing on this subject I have a snap shown
upon not clear is [redacted]
Brother Adams I'd like if you could
send me some information on U.F.O.s such
as when they started and sightings since
then could be sent to me. And the
natural phenomena of these flying objects.
Pictures could be sent, too did I don't
because they are quite a bit could
be sent. It's not very important to have the
pictures but I would like to have
such information asked for could be sent
to me. It will be greatly appreciated

Your friend,
[redacted]

The duration of the flight time
Time: 7:30 PM
Place: El Campo Texas
DATE: Oct. 14, 1965
Pattern: A circular pattern
Was bright and was a little larger than a
star.



This is not the exact event. The flight duration happened but it gives an idea of how it happened.
