Form Type: FD-71A - Guardian Complaint Form **Date:** 05/15/2025

Title: U Observation of UAP by Anoka Police Department personnel

Approved By: [redacted] 1843(a)(1)(b) 1843(a)(1)(c) 1843(a)(3)

Drafted By: [redacted]

Case ID #: [redacted] (U) Observation of UAP by Anoka Police Department personnel

1843(a)(1)(c)

Synopsis: U DOCUMENT SYNOPSIS CREATED ON 05-15-2025 04:27 PM--SEE GUARDIAN [redacted] FOR CURRENT ASSESSMENT DATA.
On 02/19/2025, at approximately 1:17am, Anoka Police Department [redacted] and two other Anoka PD employees observed a UAP near the western horizon. The skies were clear and the observation lasted for approximately 90 minutes in total. The witnesses used binoculars to get a better view of the object. The UAP appeared to be at an altitude of 10K - 30K feet and potentially 50 miles away, at one point during the observation. The UAP exhibited unusual, rapidly changing "tie-dye" multi-color lighting which was inconsistent with known aircraft lights. The UAP also exhibited rapid movement, and appeared to travel 30-40 miles in a few seconds with a movement that "skipped across the sky like a stone", inconsistent with known aircraft flight or satellite observations. The object may have flown near the location of the Monticello Nuclear Power Generation Plant. The object was further described as appearing similar to an orbital diagram of an atom, with six "hula-hoops with lights around each loop". 1843(a)(3)

[redacted] was able to capture a video of the object using his phone in combination with binoculars. This method of capture caused the video of the object to be blurry. The video from [redacted] is contained as an attachment to this incident. 1843(a)(3)

This UAP report was provided to FBI Cincinnati from a liaison partner organization, Americans for Safe Aerospace (ASA). The original ASA report of this UAP observation, with an initial interview of the witness, is contained as an attachment to this incident.

[redacted] had an additional observation on 02/17/2025, which is described in the attached ASA report. 1843(a)(3)

NUFORC UFO Sighting 187845

Occurred: 2025-01-17 02:13 Local

Reported: 2025-02-20 21:31 Pacific

Duration: 15 minutes

No of observers: 1

Location: Saint Paul, MN, USA

Location details: On the deck of my ex-wife's house unexplainable speed and direction then disappeared

Shape: Diamond

Color: Multicolor

Estimated Size: Well over a hundred yards

Viewed From: Land

Direction from Viewer: Up

Angle of Elevation: 68

Closest Distance: Too high in the sky to tell

Estimated Speed: Undescribable speed

Characteristics: Lights on object, Aura or haze around object, Changed Color, Animals reacted

Nothing ever seen before in Minnesota

The object was a diamond shaped object multi colors which was moving in every direction at speeds never seen before almost like a pool hall ball being bounced around off the walls then after about 15 minutes it took off and disappeared and to nowhere plain black sky and it just vanished

Witness Statement

Thank you for your service, and thank you for this platform. This is not a pressing matter however I believe that my narrative below is likely a common occurrence that goes unreported for multiple reasons. Let me know if you're aware of any similar reporting or data collecting agency similar to yours that is specifically geared towards law enforcement.

I work for a municipal Police Department, which is a suburb of the Minneapolis metropolitan area located approximately 25 minutes northwest of Minneapolis, MN. I am [redacted] and currently assigned as [redacted]

[redacted] 1843(a)(3)

On 2/19/2025 at approximately 0117 hours myself and two of my coworkers were conducting some training when our attention was drawn to a strange light or object on the horizon to the west/southwest of our location. We thought it appeared the object was rapidly changing colors or flashing multiple colors.

I went to my office to retrieve a set of Bushnell binoculars and repositioned at the top of a parking ramp (coordinates provided). Myself and three coworkers continued to view and monitor this object from this point of view. It was very difficult for us to estimate how far away from us the object was, however we estimated it was west/southwest 50 miles approximately from us and was somewhere between 10,000-30,000 ft of altitude. The object descended and ascended rapidly while monitoring it.

Utilizing binoculars we were able to see the object was rapidly changing colors or flashing strange lights on all surface area that I could see (I can only assume it was on all sides). The object was a sphere shape. We saw red, blue, green, and white light emitting from the object. Again it was constantly and rapidly changing color, it was never a stagnant color. Best I can describe is a 'tie dye' shirt in motion. We speculated that it was possibly attempting to emulate typical aviation navigation lights however the object did not appear to be conventional aircraft. The object slowly descended and moved southwest away from us. It descended so low along the horizon that it was nearly out of view however we could still see it just over the tops of some buildings close to our location. After monitoring the object for 25 minutes, at approximately 0140 hours a helicopter flew over the City of Rogers, MN, between our location and the object. That helicopter was approximately 12 miles southwest of our location and was flying south towards Minneapolis. As the helicopter flew between us and the

UAP Records Collection (44 U.S.C. 2107 note), 2025 Release

object, the object rapidly moved north and gained altitude. It appeared possible that the objects movement was prompted by the helicopter's proximity to it.

If I could estimate the object moved 30-40 miles north and climbed rapidly in altitude all in the matter of 5-10 seconds. At this point I would estimate the object was somewhere around 40,000 ft. We could still monitor it very clearly. One of my coworkers got in his squad and began driving west on Highway 10 into the City of Elk River, MN. He drove approximately 10 miles west and he stated that the object was still very far west of him.

Approximately 10 minutes later another aircraft which was a small private airplane flew between us and the object. The airplane was flying north and the airplane appeared to be higher than the object however the airplane was only 10 miles west of us which possibly made it appear higher in altitude. The object did not drastically alter its position when this second aircraft came through.

The object movement at this point became lethargic and somewhat stagnant however it slowly ascended and descended and continued moving west away from us until it was nearly out of sight.At this point we could barely see the object through binoculars as it was continuing to move west. So we decided to leave the area.

Prior to leaving the parking ramp I scanned other areas of the sky and I believe I saw a second object displaying similar behavior and lights straight north of our location. This object was much closer however I could not stay to monitor it. Overall we monitored the primary object for approximately 90 minutes.

It should be noted that the area we viewed from is very well lit and has terrible light pollution. You can not make out many stars at night. The Big Dipper was hardly visible and located straight over our heads. In rural Minnesota the aerial views are shocking and beautiful. However lit it was, the object was very bright and very clearly seen.

On 2/17/25 around 2330 hours I saw a similar object again to west/northwest while driving down the road on routine patrol during the course of my regular scheduled shift. I stopped and monitored that object for approximately 10 minutes. I did not discuss this with anyone until my coworkers witnessed this object with me on 2/19.

I was able to capture a video of the object that we viewed by pointing my iPhone camera into the lenses of my binoculars however it turned out nearly useless and blurry. You can see the object clearly rapidly changing color. It was too cold out for us to utilize some of our other magnified optics and night vision however in the future we will work on capturing better quality images and videos with some technology we have available to us. I can only assume we will have another opportunity to monitor these objects again as they have been seen in the area in the past.

Interviewer Notes

*First video is phone video capture attempt through a binocular

*Second video (daytime) captured and provided by secondary witness earlier in the day, 5 miles from primary witness observation point; object possibly moving in a long circle loop 'racetrack'.

Initial observation occurred near 7th avenue while conducting a nighttime training debrief. Report witnesses initially saw bright through the tree canopy. Witnesses then moved to the office to get binoculars, then moved to a parking ramp for better elevation and observation. Object approx. 40+ miles away but observed clearly visually and through binos. Observed red, green, blue, and purple lights. Object described as six "hula-hoops with lights around each loop" similar to an orbital diagram of an atom. Several witnesses observed for 20-30 minutes as the object slowly floated generally SW, Likely over Lake Minnetonka. Object remained very low on the horizon right above a building near the witness observation point.

Object then "skipped across the sky like a stone on a pond" and near-instantaneously moved 40 miles north, possibly in proximity to the Monticello Nuclear Generating Plant.

Total duration of observation 90 minutes. Officers were getting cold outside and decided to leave site. Witness then described finally getting the idea to look around in the sky for other objects. He then identified another similar object that was closer than the previous and also to the north but was too cold to continue observing.

(U) On 02/19/2025, at approximately 1:17am, Anoka Police Department [redacted] 1843(a)(3)
[redacted] and two other Anoka PD employees observed a UAP near the western horizon.
The skies were clear and the observation lasted for approximately 90 minutes in total.
The witnesses used binoculars to get a better view of the object. The UAP appeared to

UAP Records Collection (44 U.S.C. 2107 note), 2025 Release

be at an altitude of 10K - 30K feet and potentially 50 miles away, at one point during the observation. The UAP exhibited unusual, rapidly changing "tie-dye" multi-color lighting which was inconsistent with known aircraft lights. The UAP also exhibited rapid movement, and appeared to travel 30-40 miles in a few seconds with a movement that "skipped across the sky like a stone", inconsistent with known aircraft flight or satellite observations. The object may have flown near the location of the Monticello Nuclear Power Generation Plant. The object was further described as appearing similar to an orbital diagram of an atom, with six "hula-hoops with lights around each loop".

[redacted] was able to capture a video of the object using his phone in combination with binoculars. This method of capture caused the video of the object to be blurry. The video from [redacted] is contained as an attachment to this incident. 1843(a)(3)

This UAP report was provided to FBI Cincinnati from a liaison partner organization, Americans for Safe Aerospace (ASA). The original ASA report of this UAP observation, with an initial interview of the witness, is contained as an attachment to this incident.

[redacted] had an additional observation on 02/17/2025, which is described in the attached ASA report. 1843(a)(3)

(U) [redacted]

Authorized Method: Accept voluntarily provided information by governmental or private entities.
Description: [redacted] was interviewed at his office at Anoka Police Department, 275 Harrison St, Anoka, MN. After being advised of the identity of the interviewing Agent and the nature of the interview, [redacted] provided the following information:
On 02/19/2025, [redacted] had completed training with [redacted] and [redacted] and was conducting an after-action briefing in the Domino's Pizza parking lot located at 2350 7th Ave, Anoka, MN. During the briefing [redacted] observed a multi colored object hovering in the sky West of his location. [redacted] pointed the object out to [redacted] and [redacted] and [redacted] relocated to the Anoka 1843(a)(3)

UAP Records Collection (44 U.S.C. 2107 note), 2025 Release

Municipal Ramp, 2110 2nd Ave, Anoka, MN, to get an elevated position to view the object. [redacted] used his cellphone to video the object and also tracked its movement using binoculars. [redacted] describe the object's appearance as a multi colored gyroscope that was approximately the size of a SUV or school bus. [redacted] estimated that the object was Southwest of his location towards Minnetonka, MN. [redacted] observed a private air plane traveling Southeast towards his location. As the private plane neared the object's location, the object dropped in altitude and moved around the path of the air plane. The object climbed in altitude and hovered for a moment. [redacted] stated that the object changed location in three separate burst and was observed hovering West of his location towards Monticello, MN. The object hovered and then descended. [redacted] described the object's descent like a leaf floating on a breeze. [redacted] stated he observed the object for approximately 90 minutes in total. [redacted] departed the area to meet [redacted] at a local Kwik Trip. As [redacted] departed they are he observed a second object, similar to the first, hovering in the area north of Anoka, MN. 1843(a)(3)

During [redacted] observation of the object, [redacted] departed the parking ramp in his patrol car and drove West on Hwy 10. [redacted] reported back to [redacted] that he was able to see the object in the area of Monticello, MN. [redacted] drove to Elk River, MN, approximately 12 miles Northwest of Anoka, and continued to monitor the object as it hovered in the area near Monticello, MN. [redacted] departed Elk River, MN and returned to Anoka. [redacted] met up with [redacted] and [redacted] at a Kwik Trip location and spoke briefly about the object they had just observed. 1843(a)(3)

[redacted] provided reporting on three others sightings of objects, two he observed personally and the other he received from a friend. On 09/11/2022 [redacted] observed an object hovering near the Anoka Ice Arena. [redacted] recorded the object on his cellphone. The object hovered for a short period of time and climbed rapidly in altitude and became unviewable. [redacted] stated as the object climbed, a commercial aircraft come into view. [redacted] stated that when he was [redacted] years old he observed large yellow and orange orb hovering over the lake at his parents' cabin. [redacted] felt uneasy while watching it. [redacted] told his parents about it but they dismissed it a maybe a campfire reflecting off the lake. [redacted] received a video from a friend who observed three separate flashes of light that traveled north. The flash of light occurred three times and they were able to record the third flash. The light was recorded from a vehicle as it traveled north on Hwy 169 in Champlin, MN. 1843(a)(3)
