The object just did not disappear- it started some motors and gently began to move toward, above and away from the witness. It appeared that the object knew the observer had seen it because it began to move away when first seen. The husband was on the inside of the house and did not see the object. The witness appears to be a very excitable person. Her comments may one feel that she indeed saw something however her imagination began to run wild.

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

I first saw the 2 red lights pulsating when I came up to the top of a hill on my way home. It was stopped in the sky & I knew it was (stopped) almost immediately ~~stopped~~ but I could hardly believe it. I drove up & out my drive way & into garage & turned out lights of car & ran out to look at it. It was still stopped & had never moved from time I first saw it (about 3 min.) I was scared & was almost afraid to go out of garage but never hesitated. I stood & observed about a full min before I ran to bang on window to alert husband, as I started running it started motor a big, powerful sounding, but low in ~~volume~~ - Whining, smooth, gears sounds - nothing like I'd ever heard. Almost hypnotizing. My husband was on inside of house, next to T.V. going he couldn't hear them. I asked him at that time.

I was very conscious of the fact that someone was watching me from it. They seem to know that I said them & that's when they started motor & ran

over

moved slowly away from this dead
stop they had maintained.

It is impossible to put on
paper all I saw, felt, sensed, knew,
or observed that night, only one
thing I know for sure — I did
see it. It is a frightening thing
to know U.F.O. exist. I Hope you are
doing something to find an answer to
them.

P.S. a little girl on other side of
hill saw it. ~~She~~ Her mother
+ I compared notes a few days later.
