Dear Sir!

We have been seeing flying saucers around here.

The 1st was on Jan. 23, 1967 at 5:30 P.M. This was a bright orange saucer shaped object up in the sky which had left a vapor trail as wide as a road past our Mobil Home & past my fathers barn, as we have one Lane on My Dads farm.

But the most recent and most shocking to my 9 year old son, was on March 9th 1967. Craig, my son saw this saucer hoover over my Dads pond, which we can see from our mobil home. It was at a very fast speed he said, but then stopped above the pond just as fast. Then it landed in my fathers barn yard.

Send 164

He says it seemed to land down on 3 or 4 legs, as it was high enough, he could watch it from the window of our home, my son was home alone at the time. Craig said a ladder was put down, which he seemed to think looked quite long, if the saucer was on legs I suppose it was - Then this little guy got out all my fathers cattle got very scared except one, which this creature had an instrument held it and his hand in front of this cow or steer, and it didn't move, it just stood there as if it was stunned or hypnotized - What do you think? Craig said he did the same to a smaller calf. Craig was scared, so he went out on the porch here, but often was stayed inside, as he was home alone Craig said after this creature did these things, he crawled up the ladder & disappeared into

This blue grey round saucer. Craig mentioned as it hovered over the pond it seemed to be shooting fire from all around it. Anyway he states, thats what it looked like.

This thing took off Craig rec'd (6 o't. We have been watching close sence, but no sight of it or any thing.

We looked for tracks - tracks ? found none, but as the cattle in the barn yard, etc. they could have well covered up any evidence. It was mild that day - This was about 6 or 6:30 on the 9th of March P. M.

I tell you Maj Hector, I haven't slept since. I wake up all hours of night & have to peek out the window.

I'm ready to invest in a couple of huge German Shepperd Dogs.

I hope you can warn the something with those nitro people, sincerely in Research,
