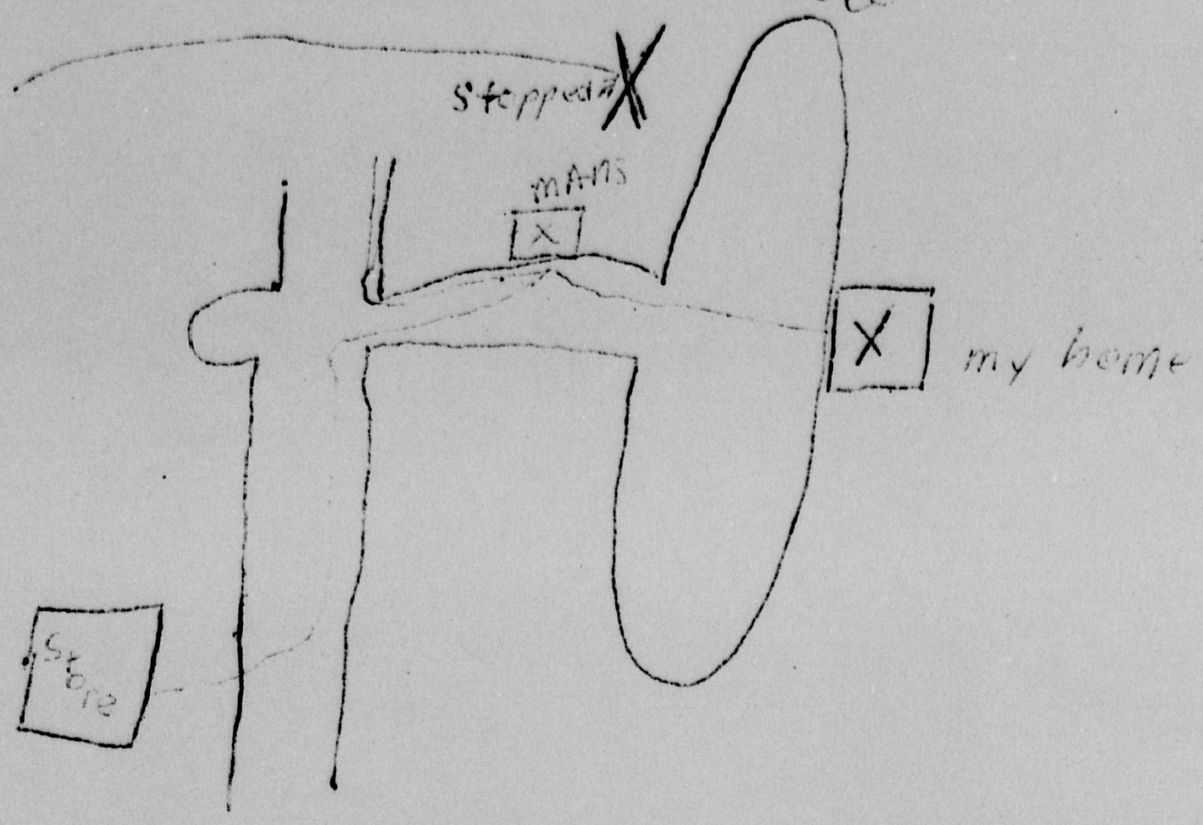
To whom it may concern,

On the night of Nov. 5 when I was returning from a store near my home I saw two U.F.O. They were traveling like this ○ . By figuring out the time when I left the store and the time when I got home it took about 5½ minutes to cross the sky. It was a little before 7:40 when I left the store and a little after 7:45 when I got home. It was part of a shifting color when it was moving, it looked like a blue-white color, and a flashing red and white when they were stopped. A man I met thought it was a satellite with reflected sun light refracting through the atmosphere causing the shifting lights. And if it was a satellite it would take in to count the facts they were going so slow and they gave off no sound. But when they stopped and started flashing the red & white lights we knew they weren't satellites. We watched it sitting there and then he went in, and I ran across the street to get the rest of my family out to see it; but they were no where to be found when they came out.

It looked about 50 or 6 times larger than a star are ● ≠ star
so I doubted because of that also that it
could be a satellite



This diagram shows the set up of my neighborhood and where the U.F.O. went across. I didn't notice him until he was about where he is on my diagram.

Thank you

noise I looked up in the sky and I guess it was just luck that I did because there were two UFOs there. When I heard the buzzing (by above) I looked back I looks for noise. Well it made no sound such as a jet or airplane just that real slight buzzing which until a many very shortly)

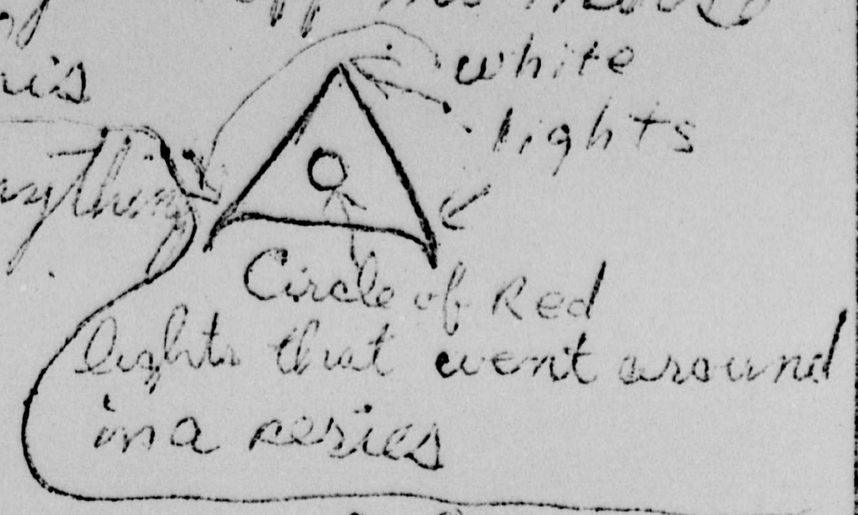
27. INFORMATION WHICH YOU FEEL IS PERTINENT BUT WHICH IS NOT ADEQUATELY COVERED IN THIS QUESTIONNAIRE, ALTERNATIVELY PROVIDE A NARRATIVE EXPLANATION OF THE SIGHTING.

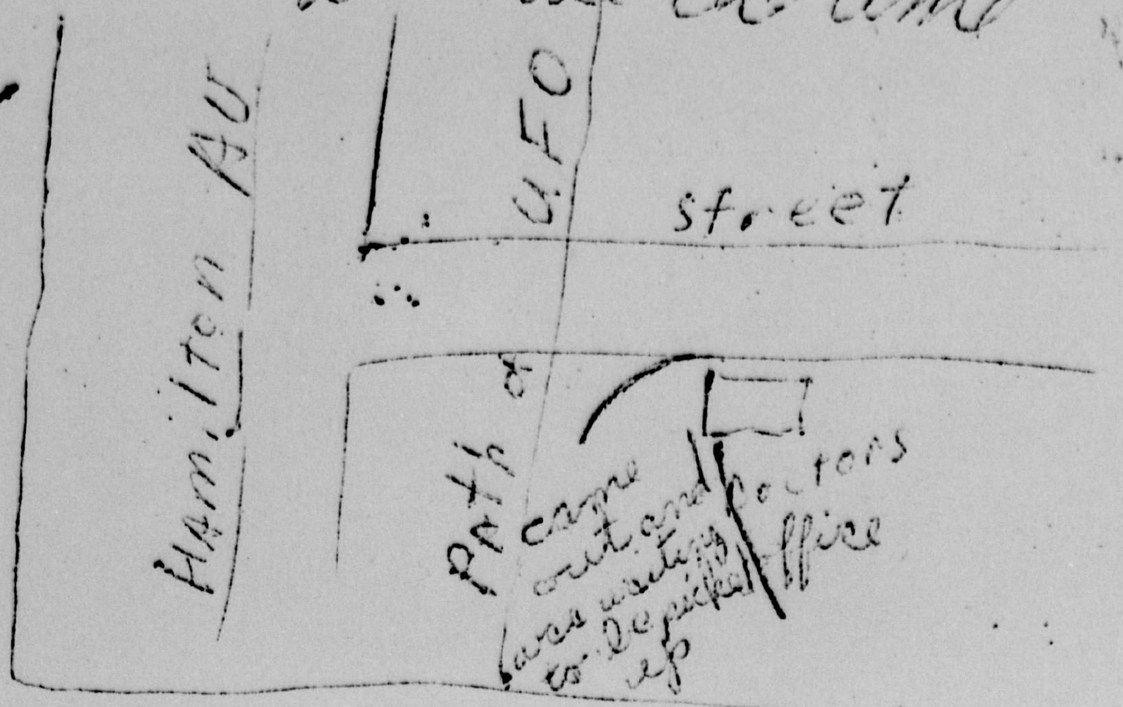
On Nov. 27 at exactly 8:30 I noticed another U.F.O. This time I timed it when it ~~was~~ went across the sky, and it was 8:37 when it went out of sight. It was flying rather low about 5° on the scale (reg.) and was flying from ~~South~~ East to ~~East~~ North. It gave off no noise. It was shaped like this



It wasn't blocked by anything all the time it was in site. There was not a cloud in the sky and the stars were very light. There was light traffic but I was standing on a small hill and with no lights near to affect my night vision I had a fairly good view of it. It looked black except for the lights. one on each ~~end~~ corner and the thing in the middle. I was about a from where I sited the other U.F.O's and on an east-west street. It passed right over head and I had a good view of it the whole time. There was a service station right

(over)

next to me with a clock on the wall and this time the first thing I did was to notice the time and the last thing also. The match would have covered about ⅓ of it. It didn't disturb the ground at all.



Thank you
