3. SOURCE Civilian	10. CONCLUSION Insufficient data for evaluation ✓ Ref.
4. NUMBER OF OBJECTS 3	
5. LENGTH OF OBSERVATION 5 hours	11. BRIEF SUMMARY AND ANALYSIS Observers watched a very bright orange-red light in the eastern part of the sky in addition to two smaller objects. The larger object appeared to have some type of tail and several lights were observed around the center of the object. The object was observed off and on for approximately 5 hours. At one time a small white dot disappeared into the big object. Without a more specific date this case is being carried as insufficient data. It would be quite difficult to determine the stimulus without an exact date so that a check of the activity in the area could be made.
