Cont'd Object was flickering on + off at a very fast pace. It was flying far too low for an air-craft. Much brighter than any star, meteorite, or statelite I have seen. Could not have been a plane because it seemed to stop in mid-air and pause for maybe 1-2 minutes then take off straight up into the air as a rocket. Got very good look at it. Flickering stopped and it just sort of glowed during pause. Could see 3-6 small lights in center of object before it lit up again very bright and shot straight up. Flashing Blue-white light was very fast maybe 2 flashes per second.
