It didn't seem reasonable a plane as fit.

We can't say how fast it went as it seemed to stand still as now at a slow rate of speed, then increase its speed, as in a few minutes.

The color of this bright, intense light is something very different, I do feel it was something "special".

A plane can not stand still in mid-air and disappear that fast before your eyes. Stars are not that large, the object was too unhandled.

This report is done to the best of my knowledge. I hope I've been some kind of help to you.

34. Date you completed this questionnaire: 4th (Day) July (Month) 67 (Year)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

I was coming home from a movie I happened to notice a strange object in the sky to my left. I called it to everyone's attention and they saw it directly in front of us. We pulled the car to the side of the road and got out. Immediately the strange object had passed to our right and seemed to stand still. We stood there looking up, the first thing that came to our minds was it must be a "flying saucer". It gave us an eerie feeling. It was so different, somehow (like a flash) it was into space.

But it should be reported to someone so we called Dallas Texas Air Station. We kept this quiet. (Air Force) I can't wait to get it out of my mind. I'm very much interested in this. I shall be waiting for some kind of a reply from you.

I do know that it was not a plane or a shooting star. We looked for running or landing lights as on a plane there were none. (our)
