U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will *not* be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

23	April	1967
Day	Month	Year

2. Time of day: 8 (Hour) : 10 (Minutes)

(Circle One): A.M. or (P.M.)

3. Time Zone:

(Circle One): (a) Eastern
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): (a) Daylight Saving
b. Standard

4. Where were you when you saw the object?

Reading	Reading	Berks; Pennsylvania
Nearest Postal Address	City or Town	State or County

5. How long was object in sight? (Total Duration)

0	1	?
Hours	Minutes	Seconds

a. Certain
b. Fairly certain
(c.) Not very sure
d. Just a guess

5.1 How was time in sight determined? estimate determined by travel time

5.2 Was object in sight continuously? Yes X No _____

6. What was the condition of the sky?

DAY	NIGHT
a. Bright	(a.) Bright
b. Cloudy	b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One):
a. In front of you
b. In back of you
c. To your right
d. To your left
e. Overhead
f. Don't remember

FORM FTD OCT 62 164 This form supersedes FTD 164, Jul 61, which is obsolete.

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS *(Circle One)*:

a. None
(b.) A few
c. Many
d. Don't remember

8.2 MOON *(Circle One)*:

(a.) Bright moonlight
b. Dull moonlight
c. No moonlight – pitch dark
d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS *(Circle One)*:

(a.) Clear sky
b. Hazy
c. Scattered clouds
d. Thick or heavy clouds

WEATHER *(Circle One)*:

(a.) Dry
b. Fog, mist, or light rain
c. Moderate or heavy rain
d. Snow
e. Don't remember

10. The object appeared: *(Circle One)*:

a. Solid
b. Transparent
c. Vapor
(d.) As a light
e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? *(Circle One)*:

a. Brighter
b. Dimmer
c. About the same
d. Don't know

11.1 Compare brightness to some common object:

Four times as bright as Venus

12. The edges of the object were:

(Circle One):
a. Fuzzy or blurred
b. Like a bright star
(c.) Sharply outlined
d. Don't remember

e. Other _____

13. Did the object:

(Circle One for each question)

a. Appear to stand still at any time?	Yes	(No)	Don't know
b. Suddenly speed up and rush away at any time?	Yes	(No)	Don't know
c. Break up into parts or explode?	Yes	(No)	Don't know
d. Give off smoke?	Yes	(No)	Don't know
e. Change brightness?	Yes	(No)	Don't know
f. Change shape?	Yes	(No)	Don't know
g. Flash or flicker?	Yes	(No)	Don't know
h. Disappear and reappear?	Yes	(No)	Don't know

14. Did the object disappear while you were watching it? If so, how? No

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what in front of: _____

17. Tell in a few words the following things about the object:

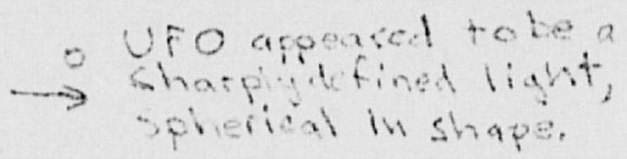
a. Sound none

b. Color white

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

Object's size was compared with a star. Two-thirds of the object would have been covered by the match head.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.



MOUNT PENN

20. Do you think you can estimate the speed of the object?

(Circle One) (Yes) No

IF you answered YES, then what speed would you estimate? 1200 plus

21. Do you think you can estimate how far away from you the object was?

(Circle One) (Yes) No

IF you answered YES, then how far away would you say it was? Four miles

22. Where were you located when you saw the object? (Circle One):

a. Inside a building
(b.) In a car
c. Outdoors
d. In an airplane (type)
e. At sea
f. Other _____

23. Were you (Circle One)

a. In the business section of a city?
b. In the residential section of a city?
c. In open countryside?
(d.) Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North
b. Northeast
c. East
d. Southeast
e. South
f. Southwest
g. West
h. Northwest

24.2 How fast were you moving? 45 miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes (No)

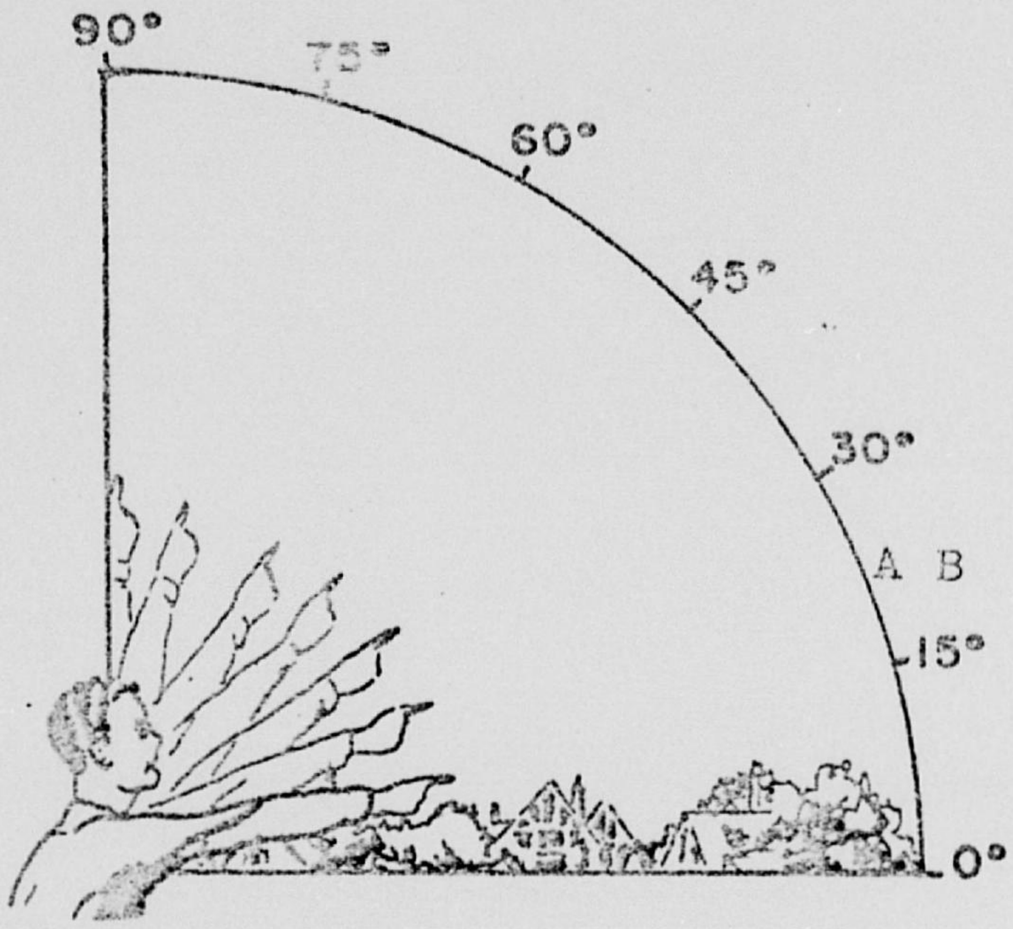
25. Did you observe the object through any of the following?

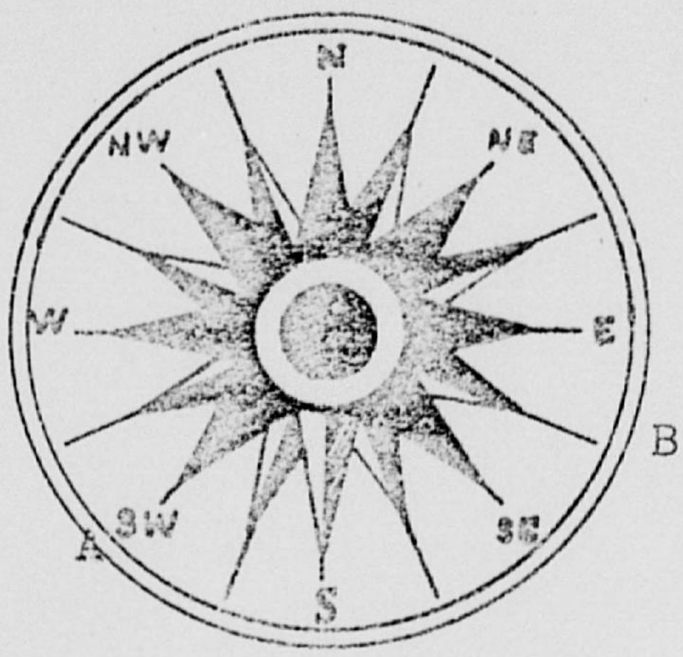
a. Eyeglasses	Yes	(No)	e. Binoculars	Yes	(No)
b. Sun glasses	Yes	(No)	f. Telescope.	Yes	(No)
c. Windshield	(Yes)	No	g. Theodolite	Yes	(No)
d. Window glass	Yes	(No)	h. Other _____		

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

I can think of no object which would give the same appearance. It looked like a sharply defined light.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.





28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

A

B

29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

No.

31. Was anyone else with you at the time you saw the object? *(Circle One)* Yes No

31.1 IF you answered YES, did they see the object too? *(Circle One)* Yes No

31.2 Please list their names and addresses:

[redacted]

19506

32. Please give the following information about yourself:

NAME [redacted] (Last Name) [redacted] (First Name) --------- (Middle Name)

ADDRESS [redacted] (Street) Bernville * (City) --- (Zone) Pennsylvania (State)

TELEPHONE NUMBER [redacted] ** AGE 44 SEX Male

Indicate any additional information about yourself, including any special experience, which might be pertinent.

I served in the United States Air Force from 1942-1946.

* Address is subject to change as of July 8, 1967 to:
[redacted] #1, Leesport, Pennsylvania

** Phone number subject to change but as of yet, unknown.

33. When and to whom did you report that you had seen the object? My family, upon arriving home.

23 (Day) April (Month) 1967 (Year)

Also reported it to the Laymens Investigation Committee on Research of Aerial Sightings on April 25, 1967.

34. Date you completed this questionnaire: 5 (Day) June (Month) 1967 (Year)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting. (Narrative)

As I was driving Southeast toward Reading, Pennsylvania on Route 183, at 8:10 P. M. on April 23, 1967, an extremely fast moving light caught my eye. If it hadn't been for its tremendous speed, about 1200 mph if not as much as 1800 mph (it was moving two or three times the speed of a conventional jet), I probably wouldn't have noticed the object. It was about four miles away and it appeared to be flying from west to east over nearby Mount Penn. The object was very bright (four times as bright as Venus would be on a clear night) and the edges were quite easily distinguishable. It was in sight for one minute or less. The object finally got too far away to be visible.

Upon arriving home some twenty minutes later, I reported that I had observed a UFO to my family (my son in particular, who is a member of the Laymen's Investigation Committee on the Research of Aerial Sightings). My son then went out to observe the sky and noticed a vapor trail in the sky.

Two nights later (25 April 1967) I filled out one of the questionnaires of the Laymen's Investigation Committee on the Research of Aerial Sightings, which closely corresponds with the Air Force's questionnaire. I also used that form as a reference to this questionnaire.

My son's organization reported to me that it had inquired to the local airport (General Spaatz Field), and it had received no reports of jet aircraft in the area at that time.

A few days ago I was given this report and at the same time was shown the Air Force letter sent by Major Quintanilla stating that because of the time lapse, the object might not be identified. I venture to say that I have Never seen an object of this type before.

OFFICIAL U.S. AIR

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will *not* be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

16 (Day) APRIL (Month) 1967 (Year)

2. Time of day: 9 (Hours) 35 (Minutes)

(Circle One): A.M. or (P.M.)

3. Time Zone:

(Circle One): (a. Eastern)
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
(b. Standard)

4. Where were you when you saw the object?

[redacted] (Nearest Postal Address) KALAMAZOO (City or Town) MICHIGAN (State or County)

5. How long was object in sight? (Total Duration) _____ (Hours) 5 (Minutes) _____ (Seconds)

a. Certain
(b. Fairly certain)
c. Not very sure
d. Just a guess

5.1 How was time in sight determined? Clock

5.2 Was object in sight continuously? Yes _____ (No)

6. What was the condition of the sky?

DAY	NIGHT
a. Bright	a. Bright
b. Cloudy	(b. Cloudy)

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One):
a. In front of you
b. In back of you
c. To your right
d. To your left
e. Overhead
f. Don't remember

REPLY TO ATTN OF: DCOI

SUBJECT: UFO

1 May 1967

TO: Foreign Technology Division
Air Force Systems Command
Wright Patterson Air Force Base, Ohio

1. In accordance with the provisions of AFR 200-2, Paragraph 3, the following report is submitted on the subject sighting:

a. Description of Object:

(1) Disc shaped object with two distinct levels (upper & lower deck).

(2) Length of KC-135.

(3) Very bright - brilliant white.

(4) One (1).

(5) Not applicable.

(6) Two level appearance - reddish looking band slighly above the midsection.

(7) None.

(8) None.

(9) None.

b. Description of Course of Object:

(1) No specific item.

(2) Zero (0^{o}) as the object appeared to be floating on the water.

(3) Forty five (45^{o}).

(4) Object appeared to be floating or hovering just above the water and traveled a short distance from left to right and back. It then began to rise from the water traveling from right to left. At this time the picture was taken. Object then reversed its' flight path and disappeared from view.

(5) Object disappeared to the northeast.

(6) Approximately five (5) minutes.

c. Manner of Observation:

(1) Ground visual.

(2) None.

(3) Not applicable.

d. Time and Date of Sighting:

(1) 16/1000Z - 1100Z (Approximately).

e. Location of Observer:

(1) Beach - Northeast corner of Ramey Air Force Base.

f. Indentifying Information of Observer:

(1) Not applicable.

(2) [redacted]

g. Weather and Winds - Aloft Conditions at Time and Place of Sighting:

(1) Clear.

(2) Surface - @ 1000Z = 100°/5K; @ 1100Z = 130°/2K; @ 1200Z = 100°/2K;
6,000' - @ 1100Z = 080°/7K; 10,000' - @ 1100Z = 260°/7K
16,000' - @ 1100Z = Calm; 20,000' - @ 1100Z = 240/5K
30,000' - @ 1100Z = 270/37K; 50,000' - @ 1100Z = 280/36K

(3) 1000Z - 1200Z 25D E70M1

(4) 1000Z - 1200Z 15 NM

(5) 1000Z - .9
1100Z - .7
1200Z - .8

(6) None.

(7)	Surface to 7500'	=	-17°/7500'	
	7500' to 10,000'	=	+4°/2500'	
	10,000' to 20,000'	=	-22°/10,000'

	30,000' to 40,000'	=	-24°/10,000'	
	40,000' to 50,000'	=	-18°/10,000'	

Tropopause

h. None.

i. None.

j. None.

k. Robert D. Williamson, Captain, USAF, Chief, Combat Intelligence Branch, 72d Bomb Wing (SAC). Comments: It is the opinion of the preparing officer that Airman Padilla and Henry are reliable and stable individuals. They are not the publicity seeking type. Airman Padilla was particularly concerned that other people would think him a "Nut" if his sighting became public. After having discussed this sighting with other members of the Intelligence Division and letting the Prediction and Interpretation Section examine the 35 mm slide, this seems to be a creditable sighting incident.

l. One (1) 35 mm color slide taken by Airman Padilla.

Proposed reply to letter from A2C Guillermo Padilla

Dear Airman Padilla:

Reference your recent observation and subsequent photograph of an unidentified object. Before a comprehensive photographic analysis can be made, the following camera data is necessary:

(a) Type, model and make of camera.

(b) ~~Brand~~ and type of film.

(c) ~~Focal length of camera~~ Speed, focal length, and make of lens.

(d) ~~Exposure time~~ Filters used.

(e) ~~"f" stop.~~ Lens opening used, that is "f" stop.

(f) Shutter speed used.

If you would forward the original slide, it will be returned upon completion of the photographic analysis.

Thank you for reporting your observation to the Air Force.

1. The attached report was received by our District Office in Saigon.

2. A representative from the 524th Military Intelligence Detachment, US Army, APO 96307, stated that Sp4 Harkinson (source of information) was known as a stable, mature member of that organization who has frequently observed aircraft flight patterns in the vicinity of Tan Son Nhut Air Base from the rooftop of the 524th Military Intelligence Detachment facility.

3. It was unknown by our District Office in Saigon if any other radar or visual sightings were made concerning the attached report.

COUNTERINTELLIGENCE SPOT REPORT

1. FROM: SP4 Robert M. Harkinson, 524th MI Det (CI), APO 96307

2. SPOT REPORT NUMBER:

3. SUBJECT: Sighting of Unidentified Flying Objects

4. REFERENCE TO PREVIOUS SPOT REPORTS: None.

5. TIME, DATE, AND PLACE OF INCIDENT: Approx 0220 hrs, 17 Apr 67, Saigon Field Office, 524th MI Det (CI), 205/8 Vo Tanh, Saigon, Vietnam.

6. PERSONNEL, ORGANIZATION OR INSTALLATION INVOLVED: N/A

7. SUMMARY: At approximately 0220 hours, 17 April 1967, I observed five (5) large, illuminated, oval shaped objects, traveling in a close formation and at a very high rate of speed across the sky. At that time, I was on the roof of the Saigon Field Office of the 524th MI Detachment, located at 205/8 Vo Tanh, Saigon. I first saw these objects near the horizon to my left and watched them cover the entire field of my vision in what I believe to be less than five (5) seconds. During that period of time, the objects traveled from where I first saw them, near the horizon to my left, passed almost directly over me at what seemed to be a very great height, and then moved out of sight behind a cloud formation at the horizon to my right. The sky was partly cloudy but at the time of the sighting, the area of the sky over which they traveled was very clear with the exception of a few small patches of scattered clouds, which they seemed to be above. As the objects passed over these clouds, they were obscured from my vision until they emerged on the other side. I also observed that, as they passed between my line of sight and a star, they covered the star and blocked out its light until they had passed. This indicated to me that the objects were not transparent. It was apparent that they were not any form of conventional aircraft due to their size, shape, rate of speed and the fact that they

None

9. ACTION TAKEN BY REPORTING AGENCY: None

10. SOURCE OF INFORMATION: First hand eye-witness

11. EVALUATION OF SOURCE AND INFORMATION: N/A

12. TIME AND DATE INFORMATION RECEIVED BY REPORTING AGENCY: N/A

13. COMMENT OF REPORTING AGENCY: SUMMARY (Continued):

made no noise audible to me. Prior to the sighting of these objects, I had been observing various conventional aircraft, both propeller and jet powered, and there is no question in my mind that they were a great deal larger than any craft I have ever seen in the sky. They were also traveling at a rate of speed which I would estimate to be at least five times greater than any jet powered aircraft I have ever seen. They were too distant and traveling too fast for a detailed description to be possible. I was only able to see that they were definitely oval in shape and glowed a steady white. They seemed to be in a vertical attitude, rather than horizontal, in relation to the earth, and their formation slowly fluctuated as they passed. Approximately five (5) minutes after they passed out of sight, several jet powered aircraft, which seemed to be at a high altitude and traveling very fast, came from my far right and to my back as I faced the same direction as when I had seen the ovals. They proceeded to the area where I had lost sight of the objects, and upon reaching that point, they turned to their right and pursued the same course as the objects I had previously sighted. These aircraft were not in a formed pattern but were scattered. I'm not certain of the number of planes but there were several. I have never held any opinion concerning unidentified flying objects. Nether have I ever seen any previously. However, I believe that these objects were space craft of some kind. I am convinced that they were not reflections, conventional aircraft, meteorites or planets.

Attn: Major H. Quintanilla, Jr. Re: Sighting of 17 April 1967
from Saigon

Dear Major Quintanilla:

As reported, this case is completely unidentified and much additional information is called for. It is inconceivable that military intelligence would not have looked further into this case and, therefore, I should like to request that any further information garnered in this case be forwarded to Project Blue Book. Saigon must certainly have 24 hour radar coverage: were these objects picked up by radar?

Witness indicates that jet interception may have been involved, although objects were traveling "at least five times faster than any jet-powered aircraft I have ever seen". The objects were oval in shape and were traveling in a vertical aspect. In view of the fact that the witness "was known as a stable, mature member of the 524th Military Intelligence Attachment," it appears that all persons concerned in this sighting should be further interrogated. I further suggest that a copy of this sighting be transmitted to the University of Colorado group.

Since the source of this information was himself a member of a military intelligence detachment, it appears all the more incomprehensible that this incident was not followed up in considerable detail.

Sincerely yours,

J. Allen Hynek

MAY 29 1967

SAFOICC/Mrs Cassel/jad/79079/29 May 67

Dear [redacted]

This replies to your letter reporting your unidentified flying object (UFO) sighting.

However, without essential data such as angular velocity, flight characteristics, duration of the sighting, etc., a comprehensive evaluation cannot be undertaken. Also you neglected to mention the time and location of your sighting. I don't know what you saw -- but it was obviously not familiar to you.

We define a UFO as any aerial phenomenon or object which is unknown or appears out of the ordinary to the observer. Your observation will be filed for information purposes.

We would be interested in evaluating your photograph if you will obtain the original negative from Dell for us.

Thank you for your letter; we appreciate your interest in our program. I have attached some reading material that I think you will find interesting.

Sincerely,

BARNETT B. YOUNG
Lt Colonel, USAF

Dear Sirs:

I would like to report a UFO I saw
I was taking a ~~bird~~ field trip to Williamsburg
Virginia on April 17th + 18th on a Greyhound
Bus and suddenly I saw this Black egg-
shaped object fall from the sky, and hit the
James River and it flew out and landed on
the bank 50 yards from where it hit. I took
1 photo of it, I sent it to UFO's Flying Saucer
Reports, Dell Publishing Co, Inc, 750 Third Avenue
New York, New York 10017 If you want the
photo + negative you can get it from them
if they have it, it most likly they do. I want it
investigated.

Sincerly

NICAP MASSACHUSETTS INVESTIGATING SUBCOMMITTEE

13 Friend Court
Wenham, Massachusetts

SUBJECT: UFO REPORT (18,19 April 1966, Sharon, Massachusetts)

DATE: 29 April 1966

FROM: Raymond E. Fowler
Chairman, NICAP MASS SUBCOM

TO: NICAP, Washington

Attention: Richard Hall cc: AFSC-FTD (Project Bluebook)
Congressman, W. Bates

Enclosed is a detailed report covering UFO sightings at Sharon, Massachusetts on 18, 19 April 1966. Witnesses included members of the Sharon Police Department.

The investigation was carried out by NICAP MASS SUBCOM Investigators John O'Neill and Ernest Reid and submitted to the Chairman for final processing.

Many good quality UFO sightings are coming to the attention of NICAP MASS SUBCOM. Priorities are being set due to the number of reports being received. A constant check is being maintained with the Sky-Lite Advertising Company so that we know the flight path of the advertising plane often mistaken for a UFO. A recent report being worked on involves possible radiation. Ernest Reid, Civil Defense Radiological Monitor for his area, measured radiation 100 times greater than background radiation for the sighting area. Samples were taken and Radiation Physicist Peter Poulsen is making a throrough analysis to determine the significance of the above normal readings. A full report will be forthcoming. Mr. Walter Webb of Boston Museum of Science was appointed lead investigator for this particular sighting and all inputs will be sent to him for final report preparation.

Respectfully submitted,

Raymond E. Fowler

Raymond E. Fowler
Chairman: NICAP MASS SUBCOM

ADDENDUM IV

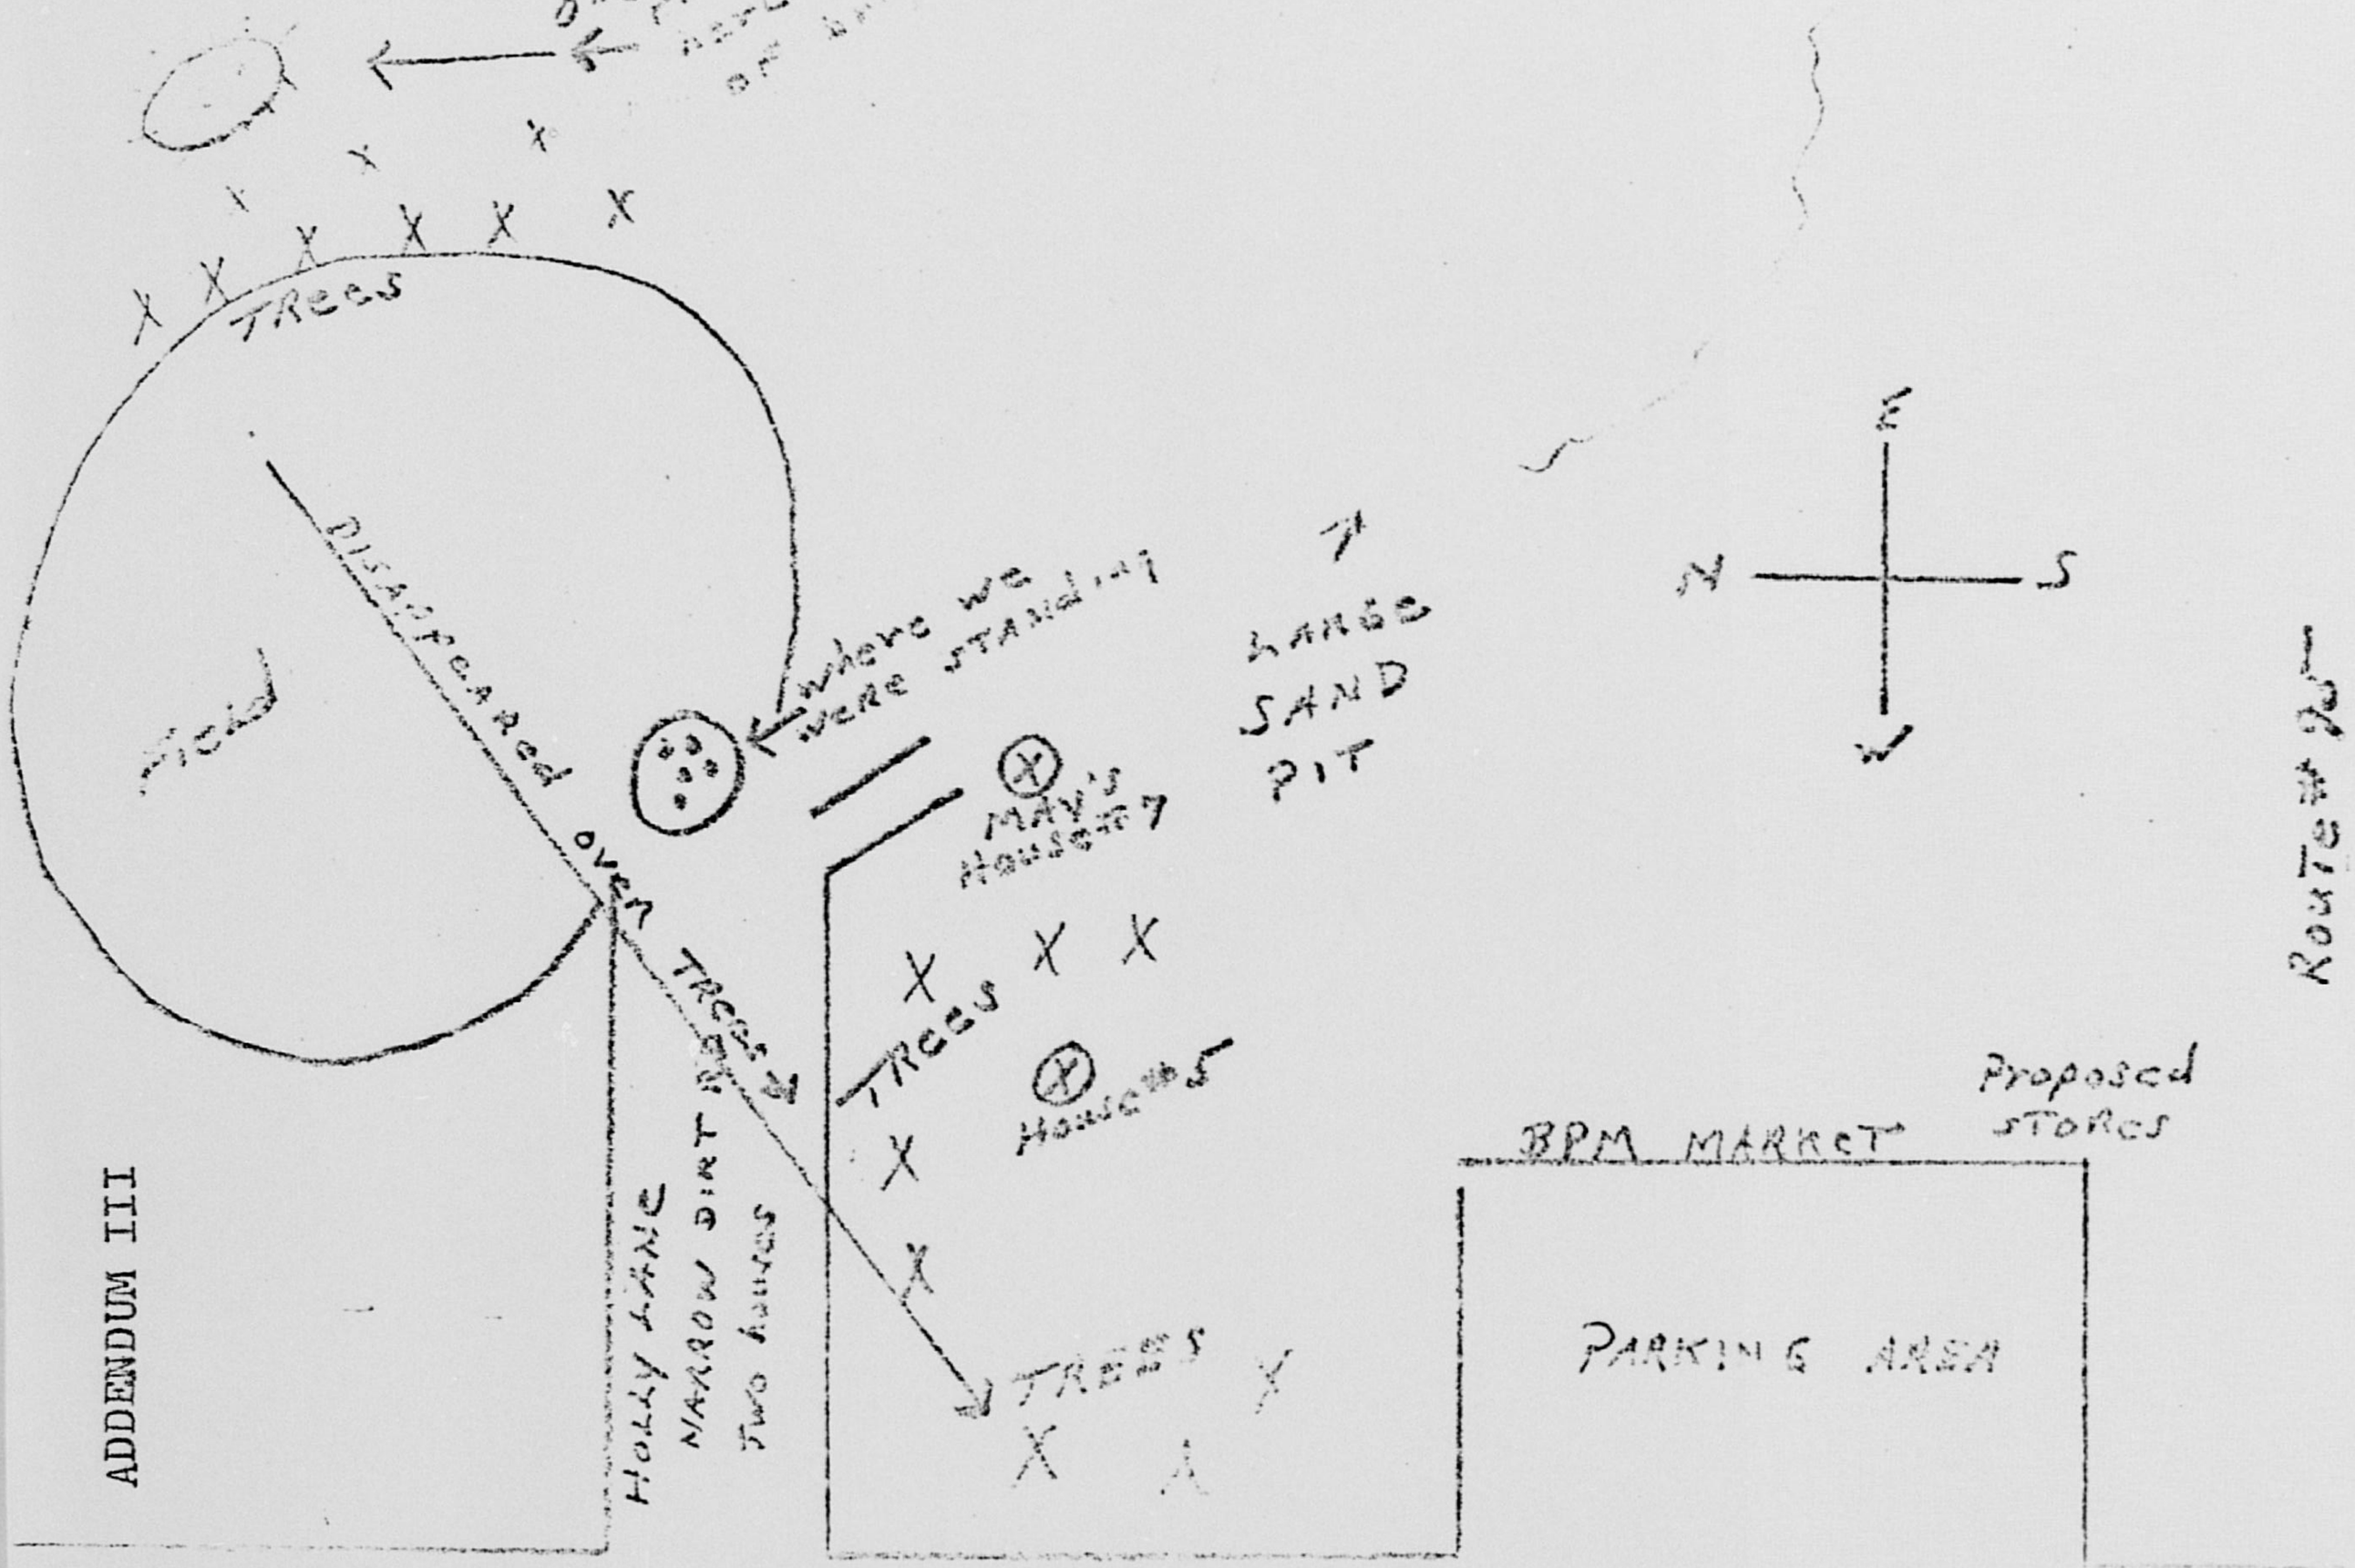
Name

Date April 19, 1966

Officer's Report:—

As the result of a telephone call recieved from Mr. and Mrs. Mav, 7 Holly Lane, reporting seeing strange objects in the sky, Officer Jones and I responded to Holly Lane. On arrival we found Officer Testa and Sgt. Donovan observing distant lights in the sky with Mr. and Mrs. Mav and Mav's sister. About 12:10 a.m. Sgt. Donovan and Officer Testa left and Officer Jones and myself watched these distant lights with the Mav's. One of these objects was in a north westerly direction, similar to a star, only brighter, it appeared to be rotating and changing colors from red to white to green. There was two other objects of the same discription in a ina south westerly direction. While we were observing these distant lights, Mrs. Mav said here it comes, or there it is, and we all looked in an easterly direction. The object appeared to be a falling star at a great distance, only three times the size of a star, and brighter. Within a matter of two or three seconds the object appeared over the tree line on the easterly side of the field in front of Mav's house about 200-300 yards away from us and approximately 500 feet up, when the object was hovering over the tree line it appeared as a very bright ,large mass of white light with a ballish appearance. The object made no noise what-so-ever, and did not cast any light onto the tree line or ground below. The object stopped and hovered over the tree line for approximately two or three minutes, while the object hovered a plane passed over in a northerly d direction, when the plane moved off the object started to move across the field in front of us in a south westerly direction. As the object passed in front of us I viewed a red light in front and a red light to the rear that remained on (not flashing) and a wide section of white light extending from red light to red light and appeared to be inside lights. I consentrated on trying to see inside of he object for any figures or movements but failed to detect any sign or life or figures. I feel as if I did see inside the object. The object disappeared as it went over the tree line in a south westerly direction.

ADDENDUM III



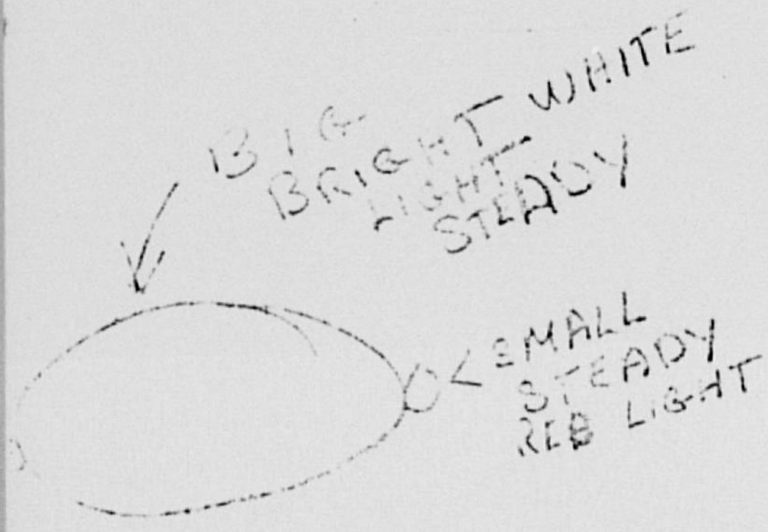
Description of object seen by Sharon, Mass. Police.

ADDENDUM II

2 Police officers and 1 Sergeant from Sharon, Mass.
2 Police officers from Foxbrough, Mass.

A bright defined yellow light came from what appeared to be the windows.

The shell of the U.F.O. gave off a "Bright Glow" of a grey metal color.



Description given by officers to NICAP on 4-20-66
U.F.O. Seen by officers on 4-19-66

UFO Sighting Reported Near Border In Quincy

[illegible] red, white and blue lights [illegible] as flying objects were observed and light [illegible] Monday, Stoughton, Foxboro and Quincy.

Purple Glow

[illegible], 196 Granite Drive, Stoughton, said he was [illegible] a drugstore on Pearl Street saw a purple glow and heard a [illegible]. This was at 3 p.m.

Here is his description of the sighting: An oval shaped object, purple in color, was high in the sky and gave forth a piercing humming sound.

The boy said the object seemed about an inch in origin in the sky and travelled in a westerly direction. The sound was high pitched.

Stoughton police sent a cruiser to the area and policemen said they saw and heard nothing. The boy's father, David I. Baelstein, also said although he did not see the flying object he heard the same noise reported by his son.

Also in Sharon at 2:15 a.m. today Mrs. George May of 7 Holly Lane reported a huge oval shaped object with red and white lights appeared in the same area as other sighting of mysterious luminous objects last Tuesday, Wednesday, Thursday and again on Monday.

White Light

She said about 14 other persons including several young children saw the object. Against a hazy and cloudy sky, she said, a huge white glow was visible. The object was about 300 to 500 feet above the ground.

The sighting made by her was basically the same as that reported Monday but with this one new detail: a concentrated white light was visible.

Mrs. May described what happened this way: It looked like a searchlight. The beam was small and then gradually increased in size. The concentrated ray of light never hit the ground, she said.

Foxboro Police Chief Dennis F. Doran said this morning there was a report of an object in the sky at 4:20 a.m. He said, "Someone saw some kind of light and the police saw it but did not know what it was. It is rather foolish. It could have been a star. Maybe there is something there."

At least two families in Quincy's Germantown section, spotted disc-shaped objects in the sky shortly before midnight.

Ten Minutes

Mrs. Arthur Shields of 28 Empire St., who watched through binoculars for about ten minutes said there was one large disc hovering above two smaller discs.

She said they displayed flashing red and white lights and made no sound.

"They were swinging like a pendulum," said Mrs. Shields who also pointed them out to her family.

(Continued on Page 4)

More UFO Sightings

(Continued from Page One)

A neighbor, Mrs. Richard Whitman of 25 Empire St., saw the unidentified flying objects independently.

Mrs. Whitman said she saw one object with red lights.

"It gradually disappeared beyond the trees and houses," she said.

Mrs. May, in an interview with The Patriot Ledger this morning, related: "It was back again early this morning. One woman took a picture with a little Polaroid camera. We are all wondering if it will come out.

"Last night my mother-in-law was on her way home and spotted a light in the sky near the Sharon Box company (Route 27) and telephoned us. Then she came back.

Big Flash

"We saw a great big flash of light like a search light and it appeared as if someone was holding a flash light."

"This lit up the whole sky. Police came to the area last night but just missed it. The object hovered above the trees for several minutes. Then it started to move. The object looked more like a huge duck egg. It was foggy and you could not make it out too good. There also was a haze. There was no noise at all."

Sharon Police Chief Albert R. Horan Jr., released for publication an official police report which was prepared by Sgt. Bernard Coffey.

Police Report

The sighting was made also by Patrolman Frederick Jones. This was on Monday night at 11:30 p.m. Here is the report.

"After receiving a call from Mr. and Mrs. May of 7 Holly Lane who reported seeing strange objects in the sky, Jones and I responded to Holly Lane."

"On arrival we found Patrolman James Testa and Sgt. Harold Donovan observing distant lights in the sky that were changing colors from red to green to white and appeared to be rotating."

"About 12:10 Patrolman Testa and Sergeant Donovan left as we were viewing these distant lights with Mr. and Mrs. May and a sister, a very bright, large mass of white light appeared traveling in a south westerly direction out of the east.

"The object stopped and hovered over the tree line on the easterly side of the field in front of the Mays' house for approximately three to five minutes.

"At this time the only visible object was the huge bright mass of white light approximately two to three hundred yards away and about four to five hundred feet up.

Lights Described

"As this object hovered for a couple of minutes, an air plane passed in a northerly direction. As the plane moved off the object started to move across the field in front of us we viewed a red light in front and a red light to the rear that remained on at all times (it was not flashing) and a wide section of white light that extended from red light to red light and appeared to be inside lights.

"We reported the incident to the Otis Air Base and they said they would give the report to the proper investigating committee to evaluate and be in touch with us at a later date.

"At no time did any noise come from the object, it remained completely silent."

"Nobody can tell me I didn't see it," Sergeant Coffey said today of the Monday sighting. "Mr. and Mrs. May, his sister, Sergeant Coffey and I saw the object off in the distance." This was late Monday night.

Rotating

"We saw it rotating. It came close. I felt as if I did see inside but saw no movement whatsoever. It was rotating. At first it appeared to look like a falling star but was three times bigger," he said.

He continued, "In less than five seconds the thing went over the trees and just held there. It appeared quick and disappeared just as quick. I did see it and it is fantastic.

"This is the closest a sighting has been made."

Sergeant Coffey estimated the height of the object at 500 feet above ground. He asked, "How could swamp gas have a red light in front and one in back? It was not blinking. I could see the curvature of these lights which would indicate the object was ova..

'Like Windows'

"The curvature of the lights appeared like windows. As I said, it looked like a falling star and then in less than five seconds was just above the trees.

"A plane could be seen off in the distance and was flying quite high. The object then disappeared. After the plane passed the object resumed movement again. Quite possibly this thing stopped because of the plane.

"The object was visible for about five or seven minutes and all I can say is it was fantastic."

Venus may Harbor Life, Scientists Say

WASHINGTON (UPI) — Two scientists from the Johns Hopkins University say that Venus appears to be the only spot [illegible] in the solar system [illegible] earth where life, as we know it, is likely to exist."

In fact, said Drs. William [illegible] and John Strong, new findings indicate there are [illegible] regions of Venus where [illegible] would find the temperature comfortable."

Writing in the April issue of [illegible] scientists said temperatures on Venus appear to range from [illegible] as 500 degrees Fahrenheit [illegible] at the planet's poles. But, they said, there are [illegible] where [illegible] support life."

ADDENDUM I

U.F.O. Sighting Report and Summary

Date of Sightings XB and 19 April 1965

Location: Sharon Massachusetts

Investigators: John J. O'Neill, NICAP Mass. Investigating Subcommittee

Norman C. Reid

Witnesses:

1. Sgt. Bernard F. Coffey, Sharon Police Department, Town of Sharon Mass.
2. Officer Reginald Jones, " " " " " "
3. Mrs. George Hyde, 7 Holly Lane, Sharon Mass., Housewife.
4. Mrs. Josephine Mahon, 245 Naomi St., Sharon Mass., Housewife.
5. Mrs. Cheryl Dandeneau, 7 Holly Lane, Sharon Mass., Housewife.
6. Mrs. Virginia Shelley, 28 Brook Rd. Sharon Mass., Housewife.
7. Mrs. Mary Howe, 37 Country Lane, Sharon Mass., Housewife.
8. Mrs. Linda M. Snelling, 40 Pond St. Sharon Mass., Housewife.
9. Mr. David W. Clapp, 16 Shepard Ct. Sharon Mass., Graduate Student.

The U.F.O. sightings covered by this report took place on two (2) successive nights, by what appear to be three separate groups of witnesses. One of the persons participating in a group sighting on the 19th, which was her second sighting in as many nights.

Since so many persons were involved in the second sighting, and the sightings of two of the witnesses are likely unrelated though similar, the witnesses and their reports have been separated into four Groups (see attachment One) for clarity.

Report Forms were completed by all of the witnesses, with the exception of Officer Jones. Of especial interest is Attachment to the completed NICAP Report Form of Sgt. Bernard Coffey, being a copy of the police report submitted by the senior officer to his superior in this case.

Summaries of the Sightings, by Groups, are as follows.

Group One Sighting, 08 April 1966
Witness: Mrs. G. [illegible]
Investigator: Investigator Robb

[illegible]

Group Two Sighting, 09 April 1966
Witness: Mrs. Linda Keeling
Investigator: Investigator Reid

Mrs. Keeling was interviewed on April 20th. 1966 at approx. 9:25 PM in the home of Mrs. Mc. [illegible] report of her sighting is as follows:

On the evening of 09 April 1966, Mrs. Keeling was a passenger in a car with her husband headed east along Bellevalgrong St. near the intersection of S.Main St. and at a point which is approximately six tenths of a mile from the Hay home. At this time Mrs. Keeling's attention was drawn to her left by a bright balloon-like light (white) with smaller red lights at the rear and which was slowly moving in a southerly direction below the scattered clouds in an estimated altitude of 800 to 1000ft.. No shape or outline was observed, and the light disappeared upwards as if into the clouds. No sound was heard. The time was approximately 12:30 AM, which was actually 00:30 of the 20th. The sighting lasted about two minutes.

Mr. Clapp was interviewed at approx. 1:40 PM on 20 April '66, in the company office, Bailey, Howe, Nestor and Rendel.

Verbal account of his sighting is as follows;

On the evening of April 19th, at approx. 12:15 AM, (actually 00:15 of the 20th.) Mr. Clapp was driving along Malden St. in a N.E. direction and near the intersection of Eqek Pond to St. which point is about one mile from the May home.

At this time his attention was attracted to his right by a very bright white light heading South at an estimated hight of 500 to 700 ft. and distant from his position by an estimated one-half mile. He stopped his vehicle, rolled down a side window, and looked out in time to see this light abruptly reverse its direction and head North.

The light moved quickly and disappeared from view, as if into the clouds. Mr. Clapp heard no sound, and states that the light gave the appearance of the headlight usually seen on the front of a railroad locomotive. This sighting lasted one minute.

Witnessed Mrs. George May (second sighting), Sharon Police Officers Sgt. Bernard Coffey and Officer Frederick Jones, Mrs. Bailey, Mrs. Howe, Mrs. Nestor and Mrs. Rendel.

Interviewed:

a) The Police Officers by Investigators O'Neill and Reid at the Police Station on 20 April between 7:45 and 8:30 PM.

b) Mrs. May by Investigator Reid at her home on 20 April between 8:40 and 9:30 PM. (See Group One Sighting)

c) Mrs. Bailey, Mrs. Howe, Mrs. Nestor and Mrs. Rendal interviewed as a group at the May home by Investigator O'Neill between 8:40 and 9:30PM on 20 April '66.

The persons noted in (b) and (c) above, were gathered at the home Of Mrs. May on the evening of April 19th., in hope of seeing the UFO reported on the previous night by the Mays.

The "vigil" started earlier in the evening, and most of the time was spent in coffee-breaks etc., taking turns standing outside watching, and sitting in autos parked at the edge of the open field adjoining the May property.

At approximately 11:45 PM, a number of lights were noticed in the NE, blinking and changing colors, low at some distance. Mrs. May called the Sharon Police to report this observation, and Officers Donovan and Testa were dispatched to the scene. The time logged at the Police Station was 11:53 PM, 19 April 1966.

At approximately midnight, Sgt. Coffey and Officer Jones, who were present when the call was received and were to start the midnight shift, were dispatched to the scene to relieve their fellow officers.

Sgt. Bernard Coffey's report (attached) is the story of what immediately followed the arrival on the scene of these officers, and will not be repeated here for the sake of brevity.

The report as submitted by Sgt. Coffey is strengthened by both the interview of himself and Officer Jones, as well as the interviews of the other persons who participated in the sighting. All stated that the object was about twice the size of a large automobile.

Additional Information

1. A study of the area around the May property was made on April 23rd. by Investigator O'Neill. The surrounding fields are for the most part dry, level, and without sign of swamp areas although a brook and drainage ditch does go through the area within a half mile. A few Cranberry bogs are located in the area to the northwest of the May area at a distance of ¼ to ½ mile.

The treeline towards which the witnesses were facing in Group Four is about six-hundred feet from the driveway (Holly Lane).

2. Chairman Raymond Fowler has provided the information that the advertising plane which has figured in many sightings in the New England area was not in use on the nights of the 17th, 18th, and 19th. of April.

3. The U.S. Weather Bureau reports for the two nights concerned are as follows:

	Monday April 18th.	Tuesday April 19th.
Wind Velocity	10 MPH Avg.	10 MPH Avg.
" Direction	Easterly	Southerly
Clouds	None	Partly Cloudy
Temperature	62H/44L	50H/40L
Ceiling	Unlimited	2200 ft.

4. Representatives from the Air Force (L.G.Hanscom Field, Bedford Mass) visited the area on Friday April 22nd. They are said to have talked to the Sharon Police Chief on that date, and we have been told by on of the officers that the Chief has directed that all UFO reports are not to be logged in the usual daily blotter, but a separate record kept of any future occurances.

5. Although the time and direction of the Group Four sighting seemingly does not lend much probability to misidentification of Astronomical Objects, a study of the positions of the bright stars and major planets (Mars, Jupiter, Venus) was made by Investigator O'Neill . Using the standard reference works in the reduction of these objects to local longitude and latitude (American Ephemeris And Nautical Almanac, 1966 and Norton's Star Atlas 19th. Edition) expected negative results were obtained.

Summation of Sightings

Group One Sighting ——

Although Mrs. May's sighting of 18 April is not supported by other witnesses, her second sighting of 19 April is in general identical, well witnessed, and during extended interview not contradictory or easily degraded.

Group Two Sighting ——

Mrs. Keeling's sighting, although not definitely related to the others, is interesting when taken in relation to the statements of witnesses in the other Group of multiple distant lights (see report of Sgt. Coffey).

Group Three Sighting ——

The same can be said of Mr. Clapp's report as of Group Two above.

Group Four Sighting ——

The heavy concentration of witnesses in this sighting leaves very little to be said or added. Although the majority of the witnesses are women and housewives, the presence of two experienced Police Officers lends additional credence to their reports.

Some inconsistencies are to be noted in the individual reports. The majority of these concern weather, UFO motion, and general time estimates. It is believed by Investigators O'Neill and Reid that these could reasonably be expected in view of the conditions under which they (the conditions) would both have to be noted and well remembered by the many witnesses.

In our opinion, having taken into consideration the reports of the many witnesses, the general attitudes and apparent intelligence of observers, and the time spent in interviews, the inspection of the area, allowance for Astronomical objects and the information relative to the advertising plane, that the reports are both factual and credible.

Attachment One

Sighting and Witness Breakdown by Groups

Group One

Witness: Mrs. George May, 7 Holly Lane, Sharon Mass.
Date : 18 April 1966
Time : Midnight

Group Two

Witness: Mrs. Linda Keeling, 40 Pond Street, Sharon Mass.
Date : 19 April 1966
Time : 12:30 PM (Actually 00:30 of the 20th.)

Group Three

Witness: Mr. David E. Clapp, 10 Shepard Court, Sharon Mass.
Date : 19 April 1966
Time : 12:15 AM (Actually 00:15 of the 20th.)

Group Four

Witnesses : Mrs. George May (second sighting)
Mrs. Virginia Bailey, 23 Brook Road Sharon Mass.
Mrs. Mary Rowe, 37 Country Lane, Sharon Mass.
Mrs. Josephine Nestor, 388 N. Main Street, Sharon Mass.
Mrs. Cheryl Rendal, 7 Holly Lane, Sharon Mass.
Sgt. Bernard F. Coffey, Sharon Police Dept., Sharon Mass.
Officer Frederick Jones, " " "

REPORT ON UNIDENTIFIED FLYING OBJECT(S)

This form includes questions asked by the United States Air Force and by other Armed Forces' investigating agencies, and additional questions to which answers are needed for full evaluation by NICAP.

After all the information has been fully studied, the conclusion of our Evaluation Panel will be published by NICAP in its regularly issued magazine or in another publication. Please try to answer as many questions as possible. Should you need additional room, please use another sheet of paper. Please print or typewrite. Your assistance is of great value and is genuinely appreciated. Thank you.

1. Name Mrs. Virginia Bailey

Address 28 Brook Road
Sharon, Mass.

Telephone 784-6915

Place of Employment

Occupation Housewife

Education 2 yrs. Forsyth School of Dental Hygiene
Special Training
Military Service

2. Date of Observation April 19, 1966 Time 12:15 AM PM Time Zone

3. Locality of Observation 7 Rolling Lane

4. How long did you see the object? Hours 2 Minutes Seconds

5. Please describe weather conditions and the type of sky; i.e., bright daylight, nighttime, dusk, etc. cloudy, nighttime -

6. Position of the Sun or Moon in relation to the object and to you. I didn't notice

7. If seen at night, twilight, or dawn, were the stars or moon visible? Stars were visible

8. Were there more than one object? NO If so, please tell how many, and draw a sketch of what you saw, indicating direction of movement, if any. From NE to SW

9. Please describe the object(s) in detail. For instance, did it (they) appear solid, or only as a source of light; was it revolving, etc? Please use additional sheets of paper, if necessary. It first appeared as a source of light but only around itself - and got brighter as it came closer - evidently - it left at diameter and almost thought you could see something resembling windows in front, - big flame

10. Was the object(s) brighter than the background of the sky? yes

11. If so, compare the brightness with the Sun, Moon, headlights, etc. The object was much brighter than the stars

12. Did the object(s) -- (Please elaborate, if you can give details.)

a. Appear to stand still at any time? NO
b. Suddenly speed up and rush away at any time? after about a min/2 it went straight up as though being pulled into a vacuum.
c. Break up into parts or explode? NO
d. Give off smoke? NO
e. Leave any visible trail? NO
f. Drop anything? NO
g. Change brightness? the closer it got the brighter it became
h. Change shape? larger
i. Change color? only luminous -

13. Did the object(s) at any time pass in front of, or behind of, anything? If so, please elaborate giving distance, size, etc, if possible. Only when it disappeared behind the clouds -

14. Was there any wind? not to speak of If so, please give direction and speed.

15. Did you observe the object(s) through an optical instrument or other aid, windshield, windowpane, storm window, screening, etc? NO What?

16. Did the object(s) have any sound? NO What kind? How loud?

17. Please tell if the object(s) was (were) —

a. Fuzzy or blurred.
b. Like a bright star. looked very bright at first and then ~~started~~ you could
c. Sharply outlined. see an outline of this object

18. Was the object --

a. Self-luminous? self-luminous --
b. Dull finish?
c. Reflecting?
d. Transparent?

19. Did the object(s) rise or fall while in motion? went up into the clouds --

20. Tell the apparent size of the object(s) when compared with the following held at arm's length:

a.	Pinhead	d.	Nickel	g.	Orange
b.	Pea	e.	Half dollar	h.	Grapefruit
c.	Dime	f.	Silver dollar	i.	Larger

Or, if easier, give apparent size in inches on a ruler held at arm's length.

21. How did you happen to notice the object(s)? We were watching for 2½ hrs --

22. Where were you and what were you doing at the time? Watching + waiting

23. How did the object(s) disappear from view? went straight up + disappeared

24. Compare the speed of the object(s) with a piston or jet aircraft at the same apparent altitude. slowly -

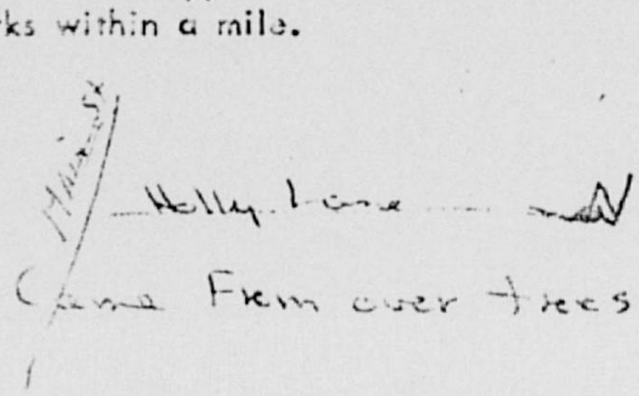
25. Were there any conventional aircraft in the location at the time or immediately afterwards? If so, please elaborate.
(2) coming there were many -

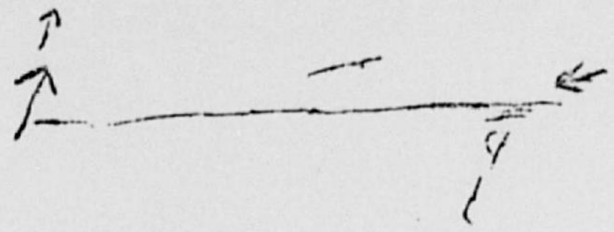
26. Please estimate the distance of the object(s). 300 Feet

27. What was the elevation of the object(s) in the sky? Please mark on this hemisphere sketch:

28. Names and addresses of other witnesses, if any.

29. Please drew a map of the locality of the observation showing North; your position; the direction from which the object(s) appeared and disappeared from view; the direction of its course over the area; roads, towns, villages, railroads, and other landmarks within a mile.





30. Is there an airport, military, governmental, or research installation in the area?
Nearest Airport -

31. Have you seen other objects of an unidentified nature? If so, please describe these observations, using a separate sheet of paper.
No

32. Please enclose photographs, motion pictures, news clippings, notes of radio or television programs (include time, station and date, if possible) regarding this or similar observations, or any other background material. We will return the material to you.

33. Were you interrogated by Air Force investigators? By any other federal, state, county, or local officials? If so, please state the name and rank or title of the agent, his office, and details as to where and when the questioning took place.

Were you asked or told not to reveal or discuss the incident? If so, were any reasons or official orders mentioned? Please elaborate carefully.
No

34. We should like permission to quote your name in connection with this report. This action will encourage other responsible citizens to report similar observations to NICAP. However, if you prefer, we will keep your name confidential. Please note your choice by checking the proper statement below. In any case, please fill in all parts of the form, for our own confidential files. Thank you for your cooperation.

You may use my name. (✓) Please keep my name confidential. ( )

1. Name David E. CLAPP
   Address 10 Shepard Court
   Sharon, Massachusetts
   Telephone 784-3795

   Place of Employment STATE COLLEGE AT BOSTON
   Occupation STUDENT
   Education -Special Training B.S. in Biology
   Military Service — MASTER of Education

2. Date of Observation 4-20-66
   Time 12:15 AM —PM— Time Zone EST
3. Locality of Observation East Foxcroft and South Main ST.
4. How long did you see the object? Hours Minutes Seconds = about one minute
5. Please describe weather conditions and the type of sky; i.e., bright daylight, nighttime, dusk, etc.
   night - partly cloudy —
6. Position of the Sun or Moon in relation to the object and to you.
   weather visible
7. If seen at night, twilight, or dawn, were the stars or moon visible? no
8. Were there more than one object? no If so, please tell how many, and draw a sketch of what you saw, indicating direction of movement, if any.
9. Please describe the object(s) in detail. For instance, did it (they) appear solid, or only as a source of light; was it revolving, etc? Please use additional sheets of paper, if necessary.
   solid - emitting a powerful beam of white light
10. Was the object(s) brighter than the background of the sky? yes
11. If so, compare the brightness with the Sun, Moon, headlights, etc. Bigger than a falling star - size of Bright star —
12. Did the object(s) — (Please elaborate, if you can give details.)
    a. Appear to stand still at any time? yes
    b. Suddenly speed up and rush away at any time? no
    c. Break up into parts or explode? no
    d. Give off smoke? no
    e. Leave any visible trail? no
    f. Drop anything? no
    g. Change brightness? no
    h. Change shape? no
    i. Change color? no
13. Did the object(s) at any time pass in front of, or behind of, anything? If so, please elaborate giving distance, size, etc, if possible.
    It went behind a cloud Bank —
14. Was there any wind? no If so, please give direction and speed.
15. Did you observe the object(s) through an optical instrument or other aid, windshield, windowpane, storm window, screening, etc? no What?
16. Did the object(s) have any sound? no What kind? How loud?
17. Please tell if the object(s) was (were) —
    a. Fuzzy or blurred. no
    b. Like a bright star. yes
    c. Sharply outlined. — to brightness restricted DE appearance of outline —

18. Was the object —

a. Self-luminous? —a
b. Dull finish? —b
c. Reflecting? —c
d. Transparent? —d

19. Did the object(s) rise or fall while in motion? yes

20. Tell the apparent size of the object(s) when compared with the following held at arm's length:

a.	Pinhead	d.	Nickel	g.	Orange
b.	Pea	e.	Half dollar	h.	Grapefruit
c.	Dime	f.	Silver dollar	i.	Larger

Or, if easier, give apparent size in inches on a ruler held at arm's length.

21. How did you happen to notice the object(s)? I was driving and noticed it

22. Where were you and what were you doing at the time? Driving toward shannon center

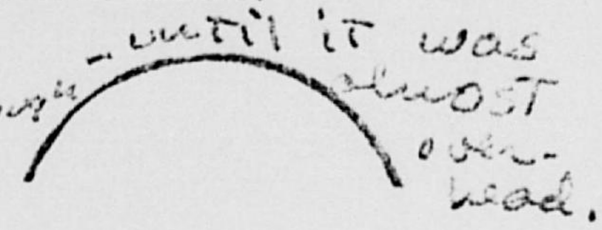
23. How did the object(s) disappear from view? into clouds

24. Compare the speed of the object(s) with a piston or jet aircraft at the same apparent altitude. seemed quite rapid - speed varied - less than 140 mph.

25. Were there any conventional aircraft in the location at the time or immediately afterwards? If so, please elaborate.
Especially I didn't see nor heard any

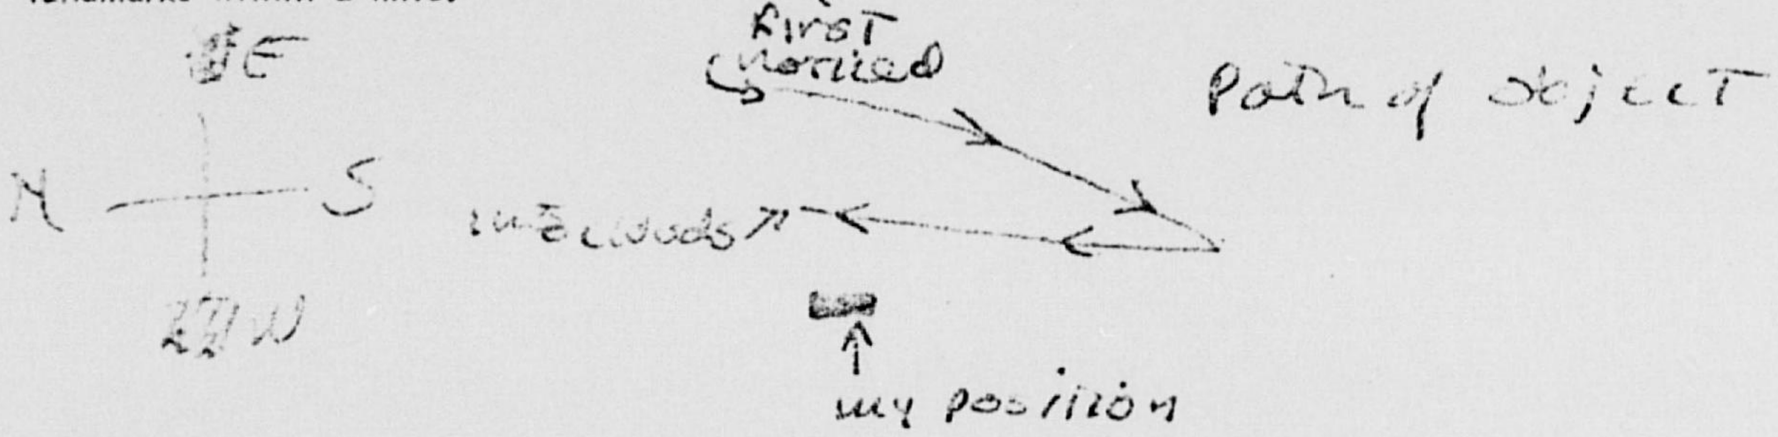
26. Please estimate the distance of the object(s).
½ mile away - 500-700 feet up - it got closer from - until it was almost overhead.

27. What was the elevation of the object(s) in the sky? Please mark on this hemisphere sketch:
45° from to about 90°



28. Names and addresses of other witnesses, if any.

29. Please draw a map of the locality of the observation showing North; your position; the direction from which the object(s) appeared and disappeared from view; the direction of its course over the area; roads, towns, villages, railroads, and other landmarks within a mile.



30. Is there an airport, military, governmental, or research installation in the area? no

31. Have you seen other objects of an unidentified nature? If so, please describe these observations, using a separate sheet of paper.
no

32. Please enclose photographs, motion pictures, news clippings, notes of radio or television programs (include time, station and date, if possible) regarding this or similar observations, or any other background material. We will return the material to you.

33. Were you interrogated by Air Force investigators? By any other federal, state, county, or local officials? If so, please state the name and rank or title of the agent, his office, and details as to where and when the questioning took place. no

   Special Training
   Telephone 784-3937 — Military Service Army

2. Date of Observation April 19, 1966 — Time 12:30M — ~~PM~~ — Time Zone

3. Locality of Observation In Front of 7 Holly Lane, Sharon, Mass.

4. How long did you see the object? Hours 5 Minutes Seconds

5. Please describe weather conditions and the type of sky; i.e., bright daylight, nighttime, dusk, etc. Nighttime clear sky--no clouds

6. Position of the Sun or Moon in relation to the object and to you. Did not notice

7. If seen at night, twilight, or dawn, were the stars or moon visible? Yes

8. Were there more than one object? If so, please tell how many, and draw a sketch of what you saw, indicating direction of movement, if any. See attached sheet

9. Please describe the object(s) in detail. For instance, did it (they) appear solid, or only as a source of light; was it revolving, etc? Please use additional sheets of paper, if necessary. See attached sheet

10. Was the object(s) brighter than the background of the sky? yes

11. If so, compare the brightness with the Sun, Moon, headlights, etc. Very bright headlights

12. Did the object(s) -- (Please elaborate, if you can give details.)

    a. Appear to stand still at any time? yes
    b. Suddenly speed up and rush away at any time? yes
    c. Break up into parts or explode? no
    d. Give off smoke? no
    e. Leave any visible trail? no
    f. Drop anything? no
    g. Change brightness? yes
    h. Change shape? yes
    i. Change color? yes

13. Did the object(s) at any time pass in front of, or behind of, anything? If so, please elaborate giving distance, size, etc, if possible. See attached sheet

14. Was there any wind? no If so, please give direction and speed.

15. Did you observe the object(s) through an optical instrument or other aid, windshield, windowpane, storm window, screening, etc? no What?

16. Did the object(s) have any sound? no What kind? complete silence How loud?

17. Please tell if the object(s) was (were) —

    a. Fuzzy or blurred. yes
    b. Like a bright star. yes
    c. Sharply outlined. yes

18. Was this object —

a. Self-luminous? yes
b. Dull finish?
c. Reflecting? NO
d. Transparent? NO

19. Did the object(s) rise or fall while in motion? Yes

20. Tell the apparent size of the object(s) when compared with the following held at arm's length:

a.	Pinhead	d.	Nickel	g.	Orange
b.	Pea	e.	Half dollar	h.	Grapefruit
c.	Dime	f.	Silver dollar	i.	Larger X

Or, if easier, give apparent size in inches on a ruler held at arm's length.

21. How did you happen to notice the object(s)? Result of a tele call reporting strange objects.

22. Where were you and what were you doing at the time? At 7 Holly Lane with 4 other people watching the sky for reported objects.

23. How did the object(s) disappear from view?
Traveled across a field and disappeared over the tree line

24. Compare the speed of the object(s) with a piston or jet aircraft at the same apparent altitude. Est. 100 mph.

25. Were there any conventional aircraft in the location at the time or immediately afterwards? If so, please elaborate. yes
See ~~atcha~~attached sheet

26. Please estimate the distance of the object(s). 200-300 yds away Approx. 500 ft up.

27. What was the elevation of the object(s) in the sky? Please mark on this hemisphere sketch:

approx 500 feet

28. Names and addresses of other witnesses, if any. Mr and Mrs May and May's sister, 7 Holly Lane

29. Please draw a map of the locality of the observation showing North; your position; the direction from which the object(s) appeared and disappeared from view; the direction of its course over the area; roads, towns, villages, railroads, and other landmarks within a mile.

=~~See~~attached= See attached sheet

30. Is there an airport, military, governmental, or research installation in the area? Next Town. Airport

31. Have you seen other objects of an unidentified nature? If so, please describe these observations, using a separate sheet of paper.
NO

32. Please enclose photographs, motion pictures, news clippings, notes of radio or television programs (include time, station and date, if possible) regarding this or similar observations, or any other background material. We will return the material to you.

33. Were you interrogated by Air Force investigators? By any other federal, state, county, or local officials? If so, please state the name and rank or title of the agent, his office, and details as to where and when the questioning took place.

   Military Service

2. Date of Observation April 19, 1966 Time AM 12:15 PM Time Zone

3. Locality of Observation 7 Holly Lane

4. How long did you see the object? [redacted] Hours Minutes 2 min Seconds

5. Please describe weather conditions and the type of sky; i.e., bright daylight, nighttime, dusk, etc. night

6. Position of the Sun or Moon in relation to the object and to you. None

7. If seen at night, twilight, or dawn, were the stars or moon visible? Stars

8. Were there more than one object? no If so, please tell how many, and draw a sketch of what you saw, indicating direction of movement, if any.

9. Please describe the object(s) in detail. For instance, did it (they) appear solid, or only as a source of light; was it revolving, etc? Please use additional sheets of paper, if necessary. appeared at first as a spherical light. as it approached it seemed to take form of a definite oblong object with inner illuminating light and spotlight in front.

10. Was the object(s) brighter than the background of the sky? yes

11. If so, compare the brightness with the Sun, Moon, headlights, etc. headlights

12. Did the object(s) -- (Please elaborate, if you can give details.)

    a. Appear to stand still at any time? yes. when it reached the center of the field-maybe. 10 sec.
    b. Suddenly speed up and rush away at any time? no
    c. Break up into parts or explode? no
    d. Give off smoke? a haze-like quality
    e. Leave any visible trail? no
    f. Drop anything? no
    g. Change brightness? no
    h. Change shape? no
    i. Change color? no

13. Did the object(s) at any time pass in front of, or behind of, anything? If so, please elaborate giving distance, size, etc, if possible. no

14. Was there any wind? no If so, please give direction and speed.

15. Did you observe the object(s) through an optical instrument or other aid, windshield, windowpane, storm window, screening, etc? no What?

16. Did the object(s) have any sound? no What kind? How loud?

17. Please tell if the object(s) was (were) —

    a. Fuzzy or blurred.
    b. Like a bright star. yes
    c. Sharply outlined.

18. Was the object —

a. Self-luminous? ✓
b. Dull finish?
c. Reflecting?
d. Transparent?

19. Did the object(s) rise or fall while in motion? after hovering over the Center of the field for a few seconds it rose & disappeared into clouds.

20. Tell the apparent size of the object(s) when compared with the following held at arm's length:

a.	Pinhead	d.	Nickel	g.	Orange
b.	Pea	e.	Half dollar	h.	Grapefruit ✓
c.	Dime	f.	Silver dollar	i.	Larger

Or, if easier, give apparent size in inches on a ruler held at arm's length.

21. How did you happen to notice the object(s)? we were watching for anything unusal as UFO had been seen the night before. never expected to see it.

22. Where were you and what were you doing at the time? Sitting in the car at edge of field.

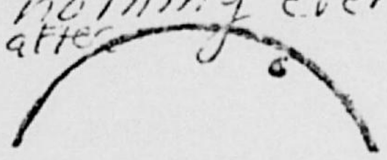
23. How did the object(s) disappear from view? Rose straight up & disappeared in Cloud Cover.

24. Compare the speed of the object(s) with a piston or jet aircraft at the same apparent altitude. moved smoothly & slowly

25. Were there any conventional aircraft in the location at the time or immediately afterwards? If so, please elaborate.
During the night we saw many planes, this was like nothing ever seen.

26. Please estimate the distance of the object(s). ? none were seen immediately after

27. What was the elevation of the object(s) in the sky? 300 ft. Please mark on this hemisphere sketch:



28. Names and addresses of other witnesses, if any.

29. Please draw a map of the locality of the observation showing North; your position; the direction from which the object(s) appeared and disappeared from view; the direction of its course over the area; roads, towns, villages, railroads, and other landmarks within a mile.

    g. Change brightness? no
    h. Change shape? no
    i. Change color? no

13. Did the object(s) at any time pass in front of, or behind of, anything? If so, please elaborate giving distance, size, etc, if possible.
    DISAPPEARED BEHIND CLOUD COVERING

14. Was there any wind? NO If so, please give direction and speed.

15. Did you observe the object(s) through an optical instrument or other aid, windshield, windowpane, storm window, screening, etc? NO What?

16. Did the object(s) have any sound? NO NOISE What kind? How loud?

17. Please tell if the object(s) was (were) [illegible]
    a. Fuzzy or blurred.
    b. Like a bright star.
    c. Sharply outlined.

18. Was the object -

a. Self-luminous?
b. Dull finish?
c. Reflecting?
d. Transparent?

19. Did the object(s) rise or fall while in motion? ROSE

20. Tell the apparent size of the object(s) when compared with the following held at arm's length:

a.	Pinhead	d.	Nickel	g.	Orange
b.	Pea	e.	Half dollar	h.	Grapefruit
c.	Dime	f.	Silver dollar	i.	Larger

Or, if easier, give apparent size in inches on a ruler held at arm's length.

21. How did you happen to notice the object(s)? WAS RIDING ~~DRIVING~~ IN CAR. MY HUSBAND POINTED IT OUT - WAS TO THE LEFT OF THE ROAD.

22. Where were you and what were you doing at the time?
RIDING IN A CAR

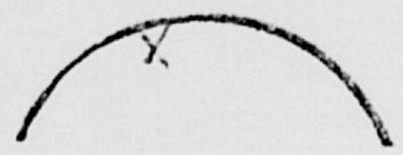
23. How did the object(s) disappear from view?
ROSE INTO THE CLOUD COVERING

24. Compare the speed of the object(s) with a piston or jet aircraft at the same apparent altitude.
ABOUT 15 OR 20 M.P.H.

25. Were there any conventional aircraft in the location at the time or immediately afterwards? If so, please elaborate.

26. Please estimate the distance of the object(s).
ABOVE ME

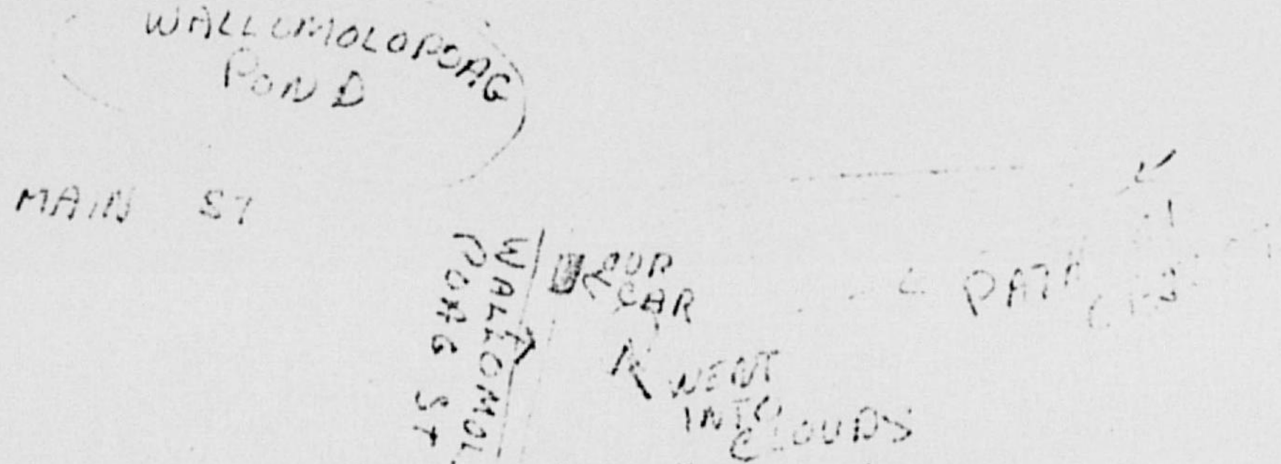
27. What was the elevation of the object(s) in the sky? Please mark on this hemisphere sketch:



HIGHT BELOW CLOUD COVERING - 800 OR 1,000 FT.?

28. Names and addresses of other witnesses, if any.

29. Please draw a map of the locality of the observation showing North; your position; the direction from which the object(s) appeared and disappeared from view; the direction of its course over the area; roads, towns, villages, railroads, and other landmarks within a mile.



30. Is there an airport, military, governmental, or research installation in the area?
LARGE AIR PORT

31. Have you seen other objects of an unidentified nature? If so, please describe these observations, using a separate sheet of paper.
NO

32. Please enclose photographs, motion pictures, news clippings, notes of radio or television programs (include time, station and date, if possible) regarding this or similar observations, or any other background material. We will return the material to you.

33. Were you interrogated by Air Force investigators? By any other federal, state, county, or local officials? If so, please state the name and rank or title of the agent, his office, and details as to where and when the questioning took place. NO

Were you asked or told not to reveal or discuss the incident? If so, were any reasons or official orders mentioned? Please elaborate carefully. NO

34. We should like permission to quote your name in connection with this report. This action will encourage other responsible citizens to report similar observations to NICAP. However, if you prefer, we will keep your name confidential. Please note your choice by checking the proper statement below. In any case, please fill in all parts of the form, for our own confidential files. Thank you for your cooperation.

REPORT ON UNIDENTIFIED FLYING OBJECT(S)

This form includes questions asked by the United States Air Force and by other Armed Forces' investigating agencies, and additional questions to which answers are needed for full evaluation by NICAP.

After all the information has been fully studied, the conclusion of our Evaluation Panel will be published by NICAP in its regularly issued magazine or in another publication. Please try to answer as many questions as possible. Should you need additional room, please use another sheet of paper. Please print or typewrite. Your assistance is of great value and is genuinely appreciated. Thank you.

1. Name Jean May
   Address 7 Holly Lane
   Sharon Mass.
   Telephone 784-3198
   Place of Employment
   Occupation Housewife
   Education
   Special Training
   Military Service High School

2. Date of Observation April 18, 19 1966
   Time AM 12:30 - 12:15 A.M. PM Time Zone EST.

3. Locality of Observation 7 Holly Lane

4. How long did you see the object? Hours 10 minutes Minutes Seconds

5. Please describe weather conditions and the type of sky; i.e., bright daylight, nighttime, dusk, etc.
   STARLIGHT no clouds

6. Position of the Sun or Moon in relation to the object and to you.

7. If seen at night, twilight, or dawn, were the stars or moon visible?
   STARS

8. Were there more than one object? If so, please tell how many, and draw a sketch of what you saw, indicating direction of movement, if any. 3
   1

9. Please describe the object(s) in detail. For instance, did it (they) appear solid, or only as a source of light; was it revolving, etc? Please use additional sheets of paper, if necessary.
   Self luminated

10. Was the object(s) brighter than the background of the sky? yes

11. If so, compare the brightness with the Sun, Moon, headlights, etc.
    Brightness of Sun only white

12. Did the object(s) — (Please elaborate, if you can give details.)

    (a.) Appear to stand still at any time?
    b. Suddenly speed up and rush away at any time?
    c. Break up into parts or explode?
    d. Give off smoke?
    e. Leave any visible trail?
    f. Drop anything?
    g. Change brightness?
    h. Change shape?
    i. Change color?

    IT APPEARED just to be white until it got closer to us. Then we could see The red lights on either end.

13. Did the object(s) at any time pass in front of, or behind of, anything? If so, please elaborate giving distance, size, etc, if possible.
    NO

14. Was there any wind? If so, please give direction and speed.

15. Did you observe the object(s) through an optical instrument or other aid, windshield, windowpane, storm window, screening, etc? NO What?

16. Did the object(s) have any sound? NO Sound What kind? How loud?

17. Please tell if the object(s) was (were) —

    a. Fuzzy or blurred.
    b. Like a bright star.
    c. Sharply outlined.

    The object was like a bright Star until it was overhead Then it appeared to be egg shaped.

18. Was the object —

(a.) Self-luminous?
b. Dull finish?
c. Reflecting?
d. Transparent?

19. Did the object(s) rise or fall while in motion? Gradual up and down motion

20. Tell the apparent size of the object(s) when compared with the following held at arm's length:

a.	Pinhead	d.	Nickel	g.	Orange
b.	Pea	e.	Half dollar	h.	Grapefruit
c.	Dime	f.	Silver dollar	(i.)	Larger

Or, if easier, give apparent size in inches on a ruler held at arm's length.

21. How did you happen to notice the object(s)? on way home and noticed in sky.

22. Where were you and what were you doing at the time? Driving home.

23. How did the object(s) disappear from view? ~~Direct~~ Took flight and disapeared

24. Compare the speed of the object(s) with a piston or jet aircraft at the same apparent altitude. Person on Bicycle

25. Were there any conventional aircraft in the location at the time or immediately afterwards? If so, please elaborate. yes passenger flight

26. Please estimate the distance of the object(s). 500 feet

27. What was the elevation of the object(s) in the sky? 500 feet Please mark on this hemisphere sketch:

28. Names and addresses of other witnesses, if any.

29. Please draw a map of the locality of the observation showing North; your position; the direction from which the object(s) appeared and disappeared from view; the direction of its course over the area; roads, towns, villages, railroads, and other landmarks within a mile.

Map of Shannon inclosed with Report.

30. Is there an airport, military, governmental, or research installation in the area? Norwood Airport

31. Have you seen other objects of an unidentified nature? If so, please describe these observations, using a separate sheet of paper. No

32. Please enclose photographs, motion pictures, news clippings, notes of radio or television programs (include time, station and date, if possible) regarding this or similar observations, or any other background material. We will return the material to you. None

33. Were you interrogated by Air Force investigators? By any other federal, state, county, or local officials? If so, please state the name and rank or title of the agent, his office, and details as to where and when the questioning took place. Steven PUTMAN Mass UFO Study Group???
Were you asked or told not to reveal or discuss the incident? If so, were any reasons or official orders mentioned? Please elaborate carefully. No

34. We should like permission to quote your name in connection with this report. This action will encourage other responsible citizens to report similar observations to NICAP.    Military Service

2. Date of Observation April 19 1966 Time 12:15 AM PM Time Zone E.S.T

3. Locality of Observation 7 Holly Lane, Sharon Mass.

4. How long did you see the object? approx Hours Minutes 2 Seconds

5. Please describe weather conditions and the type of sky; i.e., bright daylight, nighttime, dusk, etc. - Nighttime - Pity Cldy

6. Position of the Sun or Moon in relation to the object and to you. No Moon

7. If seen at night, twilight, or dawn, were the stars or moon visible? Stars visible.

8. Were there more than one object? No If so, please tell how many, and draw a sketch of what you saw, indicating direction of movement, if any.

" " " " " (Bright light)

9. Please describe the object(s) in detail. For instance, did it (they) appear solid, or only as a source of light; was it revolving, etc? Please use additional sheets of paper, if necessary. IT STARTED AS a bright light. AS IT came closer I could see a distinct spherical shape IT appeared solid.

10. Was the object(s) brighter than the background of the sky? IT radiated daylight around it. AS IT came yes toward us in the beginning it appeared to

11. If so, compare the brightness with the Sun, Moon, headlights, etc. have a soft light which penetrated through the clouds. There was a red glow of light through

12. Did the object(s) — center of object - light seemed to come (Please elaborate, if you can give details.) from inside

   a. Appear to stand still at any time? yes - when it got overhead.
   b. Suddenly speed up and rush away at any time? - yes. after it stopped.
   c. Break up into parts or explode? No
   d. Give off smoke? No
   e. Leave any visible trail? No
   f. Drop anything? No
   g. Change brightness? As it got closer yes. it became brighter To the eye
   h. Change shape? No
   i. Change color? No

13. Did the object(s) at any time pass in front of, or behind of, anything? If so, please elaborate giving distance, size, etc, if possible. NO

14. Was there any wind? Light If so, please give direction and speed.

15. Did you observe the object(s) through an optical instrument or other aid, windshield, windowpane, storm window, screening, etc? No What?

16. Did the object(s) have any sound? No What kind? How loud?

17. Please tell if the object(s) was (were) —

   a. Fuzzy or blurred.
   b. Like a bright star. - yes - (if the stars were very close)
   c. Sharply outlined. - yes.

* [illegible] into the clouds. I heard the [illegible]

18. Was the object —

a. Self-luminous? yes
b. Dull finish? no
c. Reflecting? no
d. Transparent? no

19. Did the object(s) rise or fall while in motion? yes

20. Tell the apparent size of the object(s) when compared with the following held at arm's length:

a.	Pinhead	d.	Nickel	g.	Orange
b.	Pea	e.	Half dollar	h.	Grapefruit
c.	Dime	f.	Silver dollar	i.	Larger

Or, if easier, give apparent size in inches on a ruler held at arm's length.

21. How did you happen to notice the object(s)? We were waiting to see if there would be a repeat of this. There had been a report of objects the night before.

22. Where were you and what were you doing at the time?

23. How did the object(s) disappear from view? It stopped then rose directly up into cloud

24. Compare the speed of the object(s) with a piston or jet aircraft at the same apparent altitude. Slower (much)

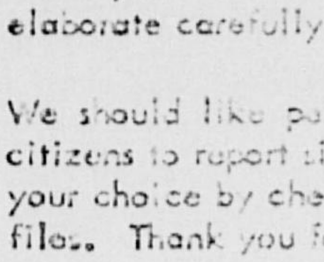
25. Were there any conventional aircraft in the location at the time or immediately afterwards? If so, please elaborate. I saw none.

26. Please estimate the distance of the object(s). Approx 300 yds

27. What was the elevation of the object(s) in the sky? Please mark on this hemisphere sketch:

28. Names and addresses of other witnesses, if any.

29. Please draw a map of the locality of the observation showing North; your position; the direction from which the object(s) appeared and disappeared from view; the direction of its course over the area; roads, towns, villages, railroads, and other landmarks within a mile.



30. Is there an airport, military, governmental, or research installation in the area? Edwards Airport.

31. Have you seen other objects of an unidentified nature? If so, please describe these observations, using a separate sheet of paper. no

32. Please enclose photographs, motion pictures, news clippings, notes of radio or television programs (include time, station and date, if possible) regarding this or similar observations, or any other background material. We will return the material to you.

33. Were you interrogated by Air Force investigators? By any other federal, state, county, or local officials? If so, please state the name and rank or title of the agent, his office, and details as to where and when the questioning took place. no

Were you asked or told not to reveal or discuss the incident? If so, were any reasons or official orders mentioned? Please elaborate carefully. no

1. Name Mrs. Cheryl Rendel
   Address 7 Holly Lane
   Sharon, Mass.
   Telephone
   Place of Employment
   Occupation Housewife
   Education
   Special Training High school
   Military Service

2. Date of Observation 4/20/65 Time 12:15 AM PM Time Zone

3. Locality of Observation Holly Lane

4. How long did you see the object? Hours 2 Minutes Seconds

5. Please describe weather conditions and the type of sky; i.e., bright daylight, nighttime, dusk, etc. nighttime clear

6. Position of the Sun or Moon in relation to the object and to you. couldn't see (not visible)

7. If seen at night, twilight, or dawn, were the stars or moon visible? no

8. Were there more than one object? no If so, please tell how many, and draw a sketch of what you saw, indicating direction of movement, if any.

9. Please describe the object(s) in detail. For instance, did it (they) appear solid, or only as a source of light; was it revolving, etc? Please use additional sheets of paper, if necessary. seem to be oval with light (moving straight (light very bright) on bottom of object were 2 red lights

10. Was the object(s) brighter than the background of the sky? yes

11. If so, compare the brightness with the Sun, Moon, headlights, etc. was bright like the moon - closer

12. Did the object(s) — (Please elaborate, if you can give details.)

    a. Appear to stand still at any time?
    b. Suddenly speed up and rush away at any time? yes, went straight up in the clouds was traveling across field suddenly
    c. Break up into parts or explode? no
    d. Give off smoke? no
    e. Leave any visible trail? no
    f. Drop anything? no
    g. Change brightness? as it got closer, it seemed to get brighter
    h. Change shape? at first seemed oval as it got closer seemed more round
    i. Change color? just seemed to get brighter

13. Did the object(s) at any time pass in front of, or behind of, anything? If so, please elaborate giving distance, size, etc, if possible.

14. Was there any wind? no If so, please give direction and speed.

15. Did you observe the object(s) through an optical instrument or other aid, windshield, windowpane, storm window, screening, etc? no What? no

16. Did the object(s) have any sound? no What kind? How loud?

17. Please tell if the object(s) was (were) —

    a. Fuzzy or blurred. no
    b. Like a bright star. brighter and much larger
    c. Sharply outlined. yes

18. Was the object —

a. Self-luminous? Yes
b. Dull finish?
c. Reflecting?
d. Transparent? No

19. Did the object(s) rise or fall while in motion? rise

20. Tell the apparent size of the object(s) when compared with the following held at arm's length:

a.	Pinhead	d.	Nickel	g.	Orange
b.	Pea	e.	Half dollar	h.	Grapefruit
c.	Dime	f.	Silver dollar	i.	Larger /

Or, if easier, give apparent size in inches on a ruler held at arm's length.

21. How did you happen to notice the object(s)? were watching

22. Where were you and what were you doing at the time? watching in the field

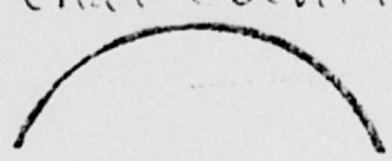
23. How did the object(s) disappear from view? yes into the clouds

24. Compare the speed of the object(s) with a piston or jet aircraft at the same apparent altitude. traveling comparitively slow

25. Were there any conventional aircraft in the location at the time or immediately afterwards? If so, please elaborate.
yes, notice quite a few airplanes that evening

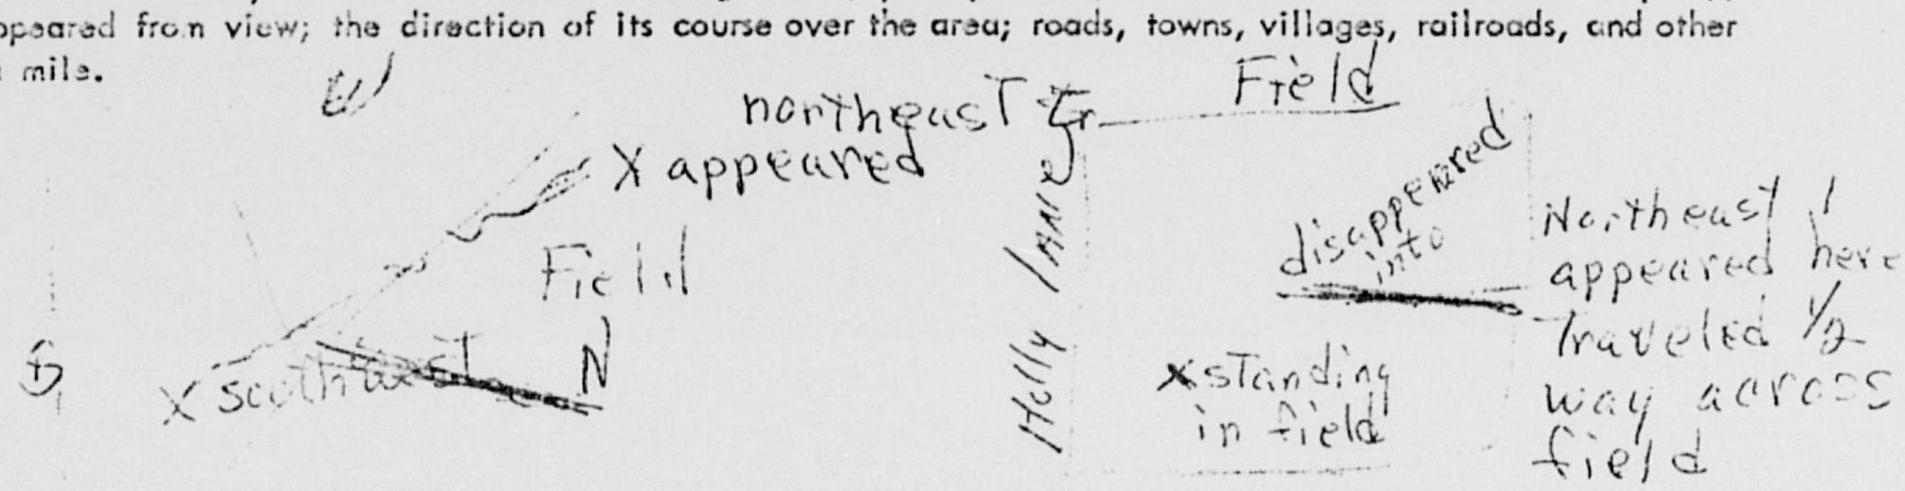
26. Please estimate the distance of the object(s). just below the clouds. 300 ft.

27. What was the elevation of the object(s) in the sky? Please mark on this hemisphere sketch:
just below the clouds



28. Names and addresses of other witnesses, if any. Mrs. Josephine Nestor
North Main St. Sharon

29. Please draw a map of the locality of the observation showing North; your position; the direction from which the object(s) appeared and disappeared from view; the direction of its course over the area; roads, towns, villages, railroads, and other landmarks within a mile.



30. Is there an airport, military, governmental, or research installation in the area? only Norwood-Airport

31. Have you seen other objects of an unidentified nature? If so, please describe these observations, using a separate sheet of paper.
yes, same same thing Monday evening.

32. Please enclose photographs, motion pictures, news clippings, notes of radio or television programs (include time, station and date, if possible) regarding this or similar observations, or any other background material. We will return the material to you. none

33. Were you interrogated by Air Force investigators? By any other federal, state, county, or local officials? If so, please state the name and rank or title of the agent, his office, and details as to where and when the questioning took place. No

Were you asked or told not to reveal or discuss the incident? If so, were any reasons or official orders mentioned? Please elaborate carefully. No

You may use my name. ( ) Please keep my name confidential. (X)

35. Date of filling out this report: 4/20/66 Signature: Cheryl Nerdo

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will *not* be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

19 (Day) April (Month) 1967 (Year)

2. Time of day: 8 (Hours) 15 (Minutes)

(Circle One): A.M. or (P.M.)

3. Time Zone:

(Circle One): a. Eastern
(b. Central)
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
b. Standard

4. Where were you when you saw the object?

[redacted] (Nearest Postal Address) Muncie (City or Town) Indiana (State or County)

5. How long was object in sight? (Total Duration) _____ (Hours) _____ (Minutes) 10-abt. (Seconds)

a. Certain
(b. Fairly certain) I'm
c. Not very sure
d. Just a guess

5.1 How was time in sight determined? my knowledge

5.2 Was object in sight continuously? Yes X No _____

6. What was the condition of the sky?

DAY	NIGHT
a. Bright	(a. Bright)
b. Cloudy	b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
b. In back of you
c. To your right
d. To your left
e. Overhead
f. Don't remember

FTD FORM OCT 62 164 This form supersedes FTD 164, jul 61, which is obsolete.

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS *(Circle One)*:

a. None
b. A few
c. Many
d. Don't remember

8.2 MOON *(Circle One)*:

a. Bright moonlight
b. Dull moonlight
c. No moonlight—pitch dark
d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS *(Circle One)*:

a. Clear sky
b. Hazy
c. Scattered clouds
d. Thick or heavy clouds

WEATHER *(Circle One)*:

a. Dry
b. Fog, mist, or light rain
c. Moderate or heavy rain
d. Snow
e. Don't remember

regular Spring night slightly chilly

0. The object appeared: *(Circle One)*:

a. Solid
b. Transparent
c. Vapor
d. As a light
e. Don't remember

. If it appeared as a light, was it brighter than the brightest stars? *(Circle One)*:

a. Brighter
b. Dimmer
c. About the same
d. Don't know

11.1 Compare brightness to some common object:

It was bright red like flasher light.

2. The edges of the object were:

(Circle One): a. Fuzzy or blurred
b. Like a bright star
c. Sharply outlined
d. Don't remember
e. Other Just like light moving through the sky

3. Did the object:

(Circle One for each question)

a. Appear to stand still at any time?	Yes	No	Don't know
b. Suddenly speed up and rush away at any time?	Yes	No	Don't know
c. Break up into parts or explode?	Yes	No	Don't know
d. Give off smoke?	Yes	No	Don't know
e. Change brightness?	Yes	No	Don't know
f. Change shape?	Yes	No	Don't know
g. Flash or flicker?	Yes	No	Don't know
h. Disappear and [illegible]	Yes	No	Don't know

64

Official U.S. Air Force

14. Did the object disappear while you were watching it? If so, how? Yes. It disappeared behind a house.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): (Yes) ~~No~~ Don't know. IF you answered YES, then tell what it moved behind: a house and that was the last I seen of it.

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes (No) Don't know. IF you answered YES, then tell what in front of:

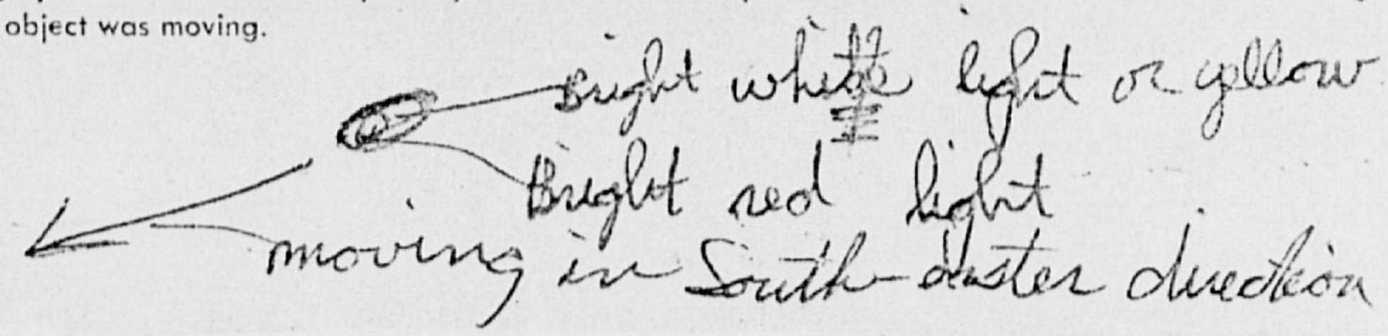
17. Tell in a few words the following things about the object:

a. Sound No sound at all at first but then I turned around and saw & heard an airplane

b. Color bright white with bright flashing red light.

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head? ~~all of the object would have been covered by the match head~~ abt 3ft. long & abt 36" in circumference

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.



FO form continued

20. Do you think you can estimate the speed of the object?

(Circle One) (Yes) No

IF you answered YES, then what speed would you estimate? about as fast as a regular speed of a prop. airplane

21. Do you think you can estimate how far away from you the object was?

(Circle One) (Yes) No

IF you answered YES, then how far away would you say it was? abt ¼ mile

22. Where were you located when you saw the object? (Circle One):

a. Inside a building
b. In a car
c. Outdoors
d. In an airplane (type)
e. At sea
f. Other standing on a sidewalk

23. Were you (Circle One)

a. In the business section of a city?
b. In the residential section of a city?
c. In open countryside?
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North c. East e. South g. West
b. Northeast d. Southeast f. Southwest h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

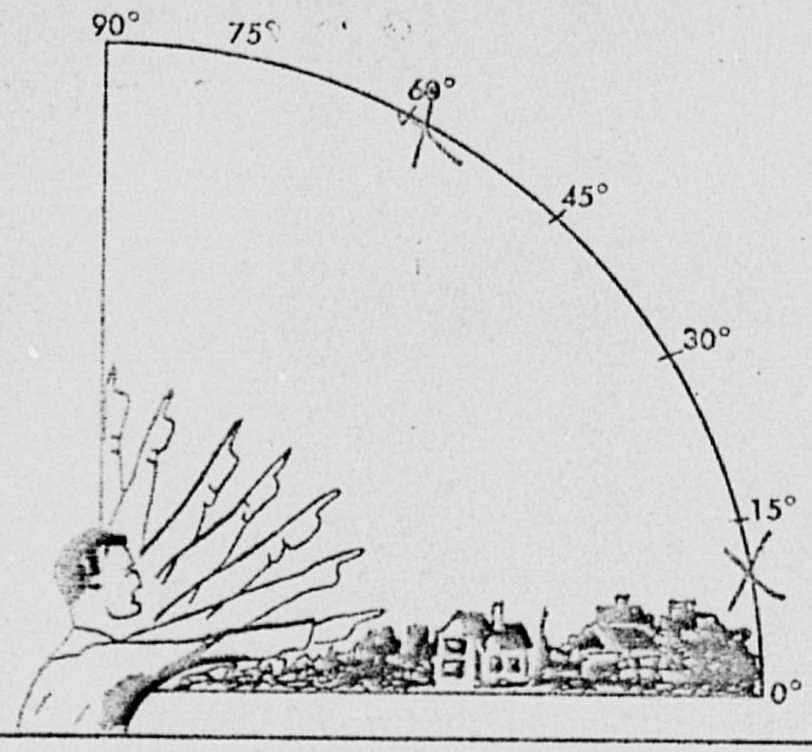
(Circle One) Yes No

25. Did you observe the object through any of the following?

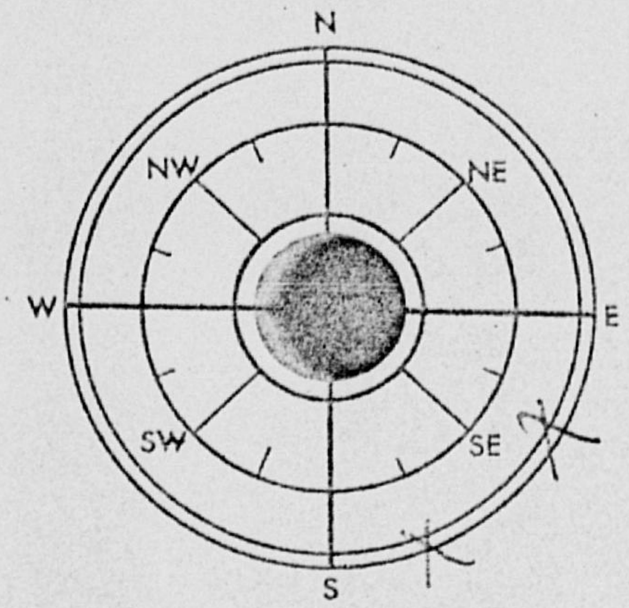
a. Eyeglasses	(Yes)	No	e. Binoculars	Yes	No
b. Sun glasses	Yes	No	f. Telescope	Yes	No
c. Windshield	Yes	No	g. Theodolite	Yes	No
d. Window glass	Yes	No	h. Other _____		

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

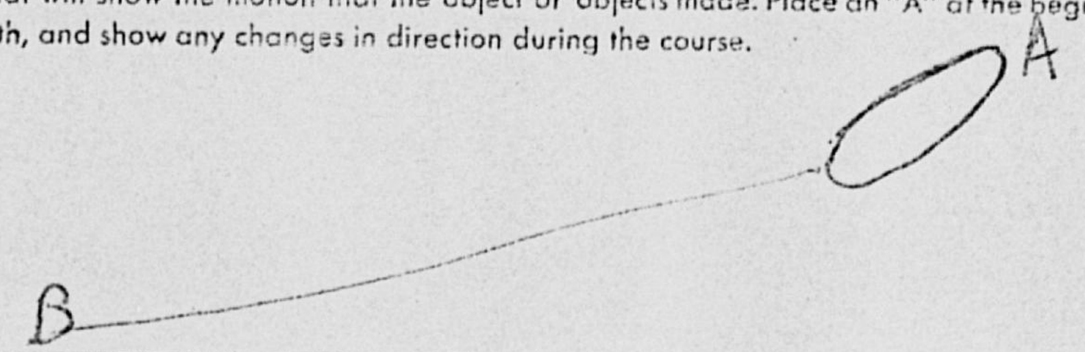
... saw the object.



... saw it. Place a "B" on the com-



28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.



29. IF there was MORE THAN ONE object, then how many were there?_____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

No

31. Was anyone else with you at the time you saw the object? *(Circle One)* (Yes) No

31.1 IF you answered YES, did they see the object too? *(Circle One)* (Yes) No

31.2 Please list their names and addresses:

Mrs. [redacted] — my grandmother

Muncie, Indiana

32. Please give the following information about yourself:

NAME [redacted] (Last Name) [redacted] (First Name) [redacted] (Middle Name)

ADDRESS [redacted] (Street) Muncie (City) (Zone) Indiana (State)

TELEPHONE NUMBER [redacted] AGE 14 SEX M

Indicate any additional information about yourself, including any special experience, which might be pertinent.

I am very intrested in the subject of U.F.O.'S
I am an associate member of the
N.I.C.A.P. organization

33. When and to whom did you report that you had seen the object? Muncie Police Dept. But they gave me the number for the State Police and I reported it to them

19 (Day) April (Month) 1967 (Year)

No

31. Was anyone else with you at the time you saw the object? *(Circle One)* (Yes) No

31.1 IF you answered YES, did they see the object too? *(Circle One)* (Yes) No

31.2 Please list their names and addresses:

[redacted] my grandmother
Mrs. [redacted]
Muncie, Indiana

32. Please give the following information about yourself:

My Grandson and I were coming home and we were heading east on the street and he said look hurry and what I saw was an object heading south east over Muncie real low for a flying object. It looked rather small and like it had dodging tree tops or might be going to land.

A bright red light on the right side of the back blinking on and off and a sort of yellow light on left side We watched it out of sight south over a houses as in our way. Hope its nothing dangerous

OFFICIAL U.S. AIR

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will *not* be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

20 April 1967
Day Month Year

2. Time of day: 830 - 900 PM
Hours Minutes

(Circle One): A.M. or (P.M.)

3. Time Zone:

(Circle One): a. Eastern
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
(b. Standard)

4. Where were you when you saw the object?

[redacted]
Nearest Postal Address

ROSELLE PARK
Roselle
City or Town

N. J. 07204
State or County

5. How long was object in sight? (Total Duration)

_____ Hours Blot 7 Dec. 2nd Minutes Seconds

a. Certain
b. Fairly certain
c. Not very sure
d. Just a guess

5.1 How was time in sight determined? assuming

5.2 Was object in sight continuously? Yes X No ____

6. What was the condition of the sky?

DAY	NIGHT
a. Bright	(a. Bright)
b. Cloudy	b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
b. In back of you
c. To your right
d. To your left
e. Overhead
f. Don't remember

FORM
FTD OCT 62 164 This form supersedes FTD 164, jul 61, which is obsolete.

FORCE UFO FORM

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS *(Circle One)*:

a. (None)
b. A few
c. Many
d. Don't remember

8.2 MOON *(Circle One)*:

a. Bright moonlight
b. Dull moonlight
c. No moonlight—pitch dark
d. Don't remember

Moon was in back of me

9. What were the weather conditions at the time you saw the object?

CLOUDS *(Circle One)*:

a. (Clear sky)
b. Hazy
c. Scattered clouds
d. Thick or heavy clouds

WEATHER *(Circle One)*:

a. (Dry)
b. Fog, mist, or light rain
c. Moderate or heavy rain
d. Snow
e. Don't remember

10. The object appeared: *(Circle One)*:

a. (Solid)
b. Transparent
c. Vapor
d. (As a light)
e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? *(Circle One)*:

a. Brighter
b. (Dimmer)
c. About the same
d. Don't know

11.1 Compare brightness to some common object:

_____

12. The edges of the object were:

(Circle One):
a. Fuzzy or blurred
b. Like a bright star
c. (Sharply outlined) round
d. Don't remember
e. Other _____

13. Did the object:

(*Circle One* for each question)

a. Appear to stand still at any time?	Yes	(No)	Don't know
b. Suddenly speed up and rush away at any time?	Yes	(No)	Don't know
c. Break up into parts or explode?	Yes	(No)	Don't know
d. Give off smoke?	Yes	(No)	Don't know
e. Change brightness?	Yes	(No)	Don't know
f. Change shape?	Yes	(No)	Don't know
g. Flash or flicker?	Yes	(No)	Don't know
h. Disappear and reappear?	Yes	(No)	Don't know

64

Official U.S. Air Force

14. Did the object disappear while you were watching it? If so, how? The object of first flight just disappeared as they were flying out of sight. Second flight flew over the house.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes .. (No) Don't know. IF you answered YES, then tell what it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes (No) Don't know. IF you answered YES, then tell what in front of: _____

17. Tell in a few words the following things about the object:

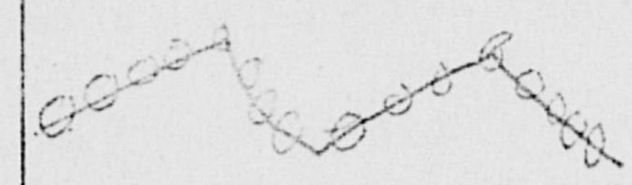
a. Sound No sound

b. Color between yellow & Orange Color

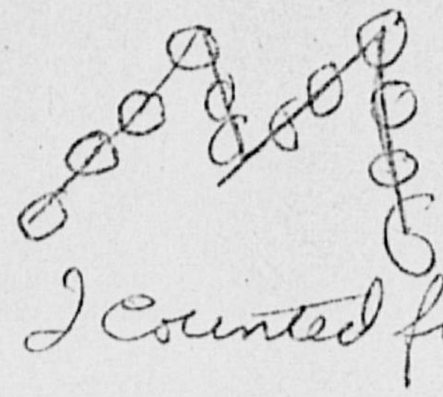
18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

(a) objects match

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.



In this flight I did not count



I counted fourteen

UFO form continued

20. Do you think you can estimate the speed of the object? All I can say, they were flying at a tremendous speed
(Circle One) Yes No

IF you answered YES, then what speed would you estimate?_____

21. Do you think you can estimate how far away from you the object was?

(Circle One) Yes (No)

IF you answered YES, then how far away would you say it was?_____

22. Where were you located when you saw the object?
(Circle One):

a. Inside a building
b. In a car
(c. Outdoors)
d. In an airplane (type)
e. At sea
f. Other_____

23. Were you (Circle One)

a. In the business section of a city?
b. In the residential section of a city?
c. In open countryside?
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other 1st on front porch
2nd back yard

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North c. East e. South g. West
b. Northeast d. Southeast f. Southwest h. Northwest

24.2 How fast were you moving?_____miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

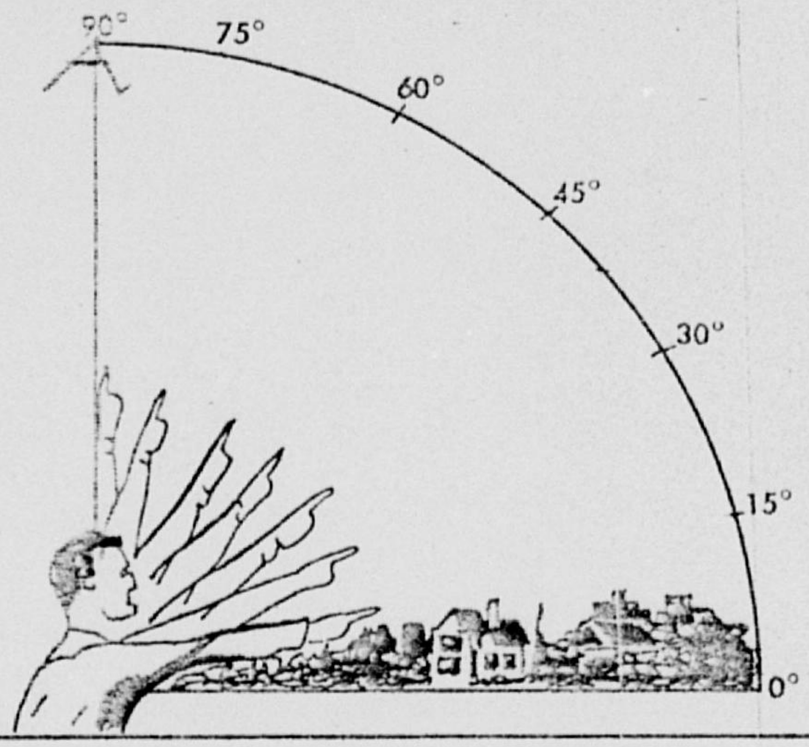
25. Did you observe the object through any of the following?

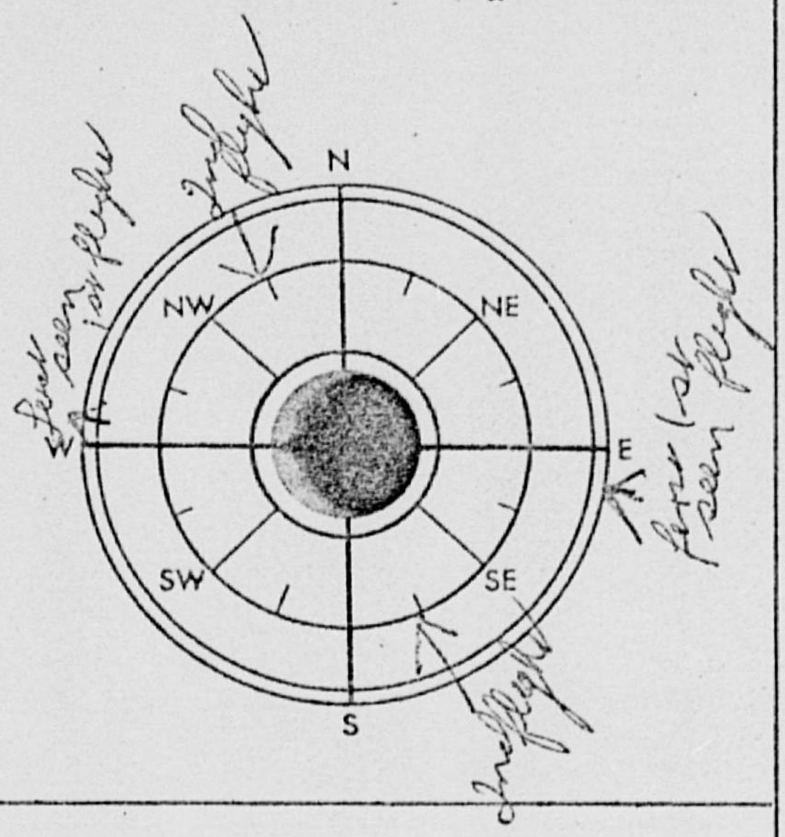
a. Eyeglasses	Yes	No	e. Binoculars	(Yes)	No	2nd flight
b. Sun glasses	Yes	No	f. Telescope	Yes	No	
c. Windshield	Yes	No	g. Theodolite	Yes	No	
d. Window glass	Yes	No	h. Other 1st flight - eyes			

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw. They were all round. glowing between yellow & Orange. They were flying in perfect VV formation. 1st flight I could not count. Second flight I counted 14.

Official U.S. Air Force

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass when you *last* saw the object.





28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

They flew a straight line of flight

29. IF there was MORE THAN ONE object, then how many were there? 1st flight I didn't count but there were many. 2nd flight I counted 14.
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

1st flight they were many. Second I counted 14

UFO form continued

30. Have you ever seen this, or a similar object before. If so give date or dates and location. Yes Last year 1966, last after Easter Sunday. I was fishing at Spruce Run & I saw a U.F.O. It was Round Silver Ray. It flew into Clouds

31. Was anyone else with you at the time you saw the object? *(Circle One)* (Yes) No

31.1 IF you answered YES, did they see the object too? *(Circle One)* Yes (No)

31.2 Please list their names and addresses:

My Step father
Mr. [redacted]
Belleville
N.J.

32. Please give the following information about yourself:

NAME [redacted] First Name [redacted] First Name [redacted] le Name

ADDRESS [redacted] Street Belleville City 07209 Zone N.J. State

TELEPHONE NUMBER [redacted] AGE 49 SEX Male

Indicate any additional information about yourself, including any special experience, which might be pertinent.

33. When and to whom did you report that you had seen the object?

May Day April Month 1967 Year

[redacted] Newark Evening News. I
took the note publish it, and to sent it to the
proper authories

34. Date you completed this questionnaire: 24 (Day) April (Month) 1967 (Year)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting. 1st flight of U.F.O. I sighted as I was coming out the front door. I was going to look at a satellite with my binoculars. I didn't use them because I did not ~~expect~~ want them. They flew in a V formation I followed them till they went out of sight. After looking at a satellite, I went to the back yard to look at the Moon. The second flight I saw through my binoculars and I counted 14. They flew at a tremendous speed, and in perfect flight formation. They were a color between yellow & orange. a dull color.

While looking through the binoculars I could only see 4 or 5 UFO. at a time.

SAF-OICC/Miss Turnure/76526/July 29, 1968

Dear [redacted]:

Your recent letter to President Johnson concerning your sighting of an unidentified flying object (UFO) has been referred to this office.

Unfortunately, you did not report your sighting soon enough so that a scientific investigation can be made. We have found that after thirty (30) days, precise details tend to become vague, and an investigation would serve little scientific or technical purpose.

Should you ever sight another UFO, please report it as soon as possible to the nearest Air Force base. Each base in the United States has a UFO investigator, who is in a better position to make an on-the-spot investigation, which usually results in a more accurate analysis.

We are, however, inclosing a copy of the latest Project Blue Book report. By reading it, you may be able to discover what it was that you observed.

Sincerely,

Attachment

Dear Mrs. Pearl,

Why didn't you tell me you were coming to Auburn. I'm so sorry I missed you. I'll be in Auburn on Friday the 23rd. Be sure to call me when you get in. I'll be at the Auburn Inn. Maybe we can have lunch or dinner together. I'm going to make you a special dish.

P.S. Be sure to bring your camera. I want to take some pictures of you.

P.S.S. It will be very pretty here.

Your best friend,

22 April 66

NICAP MASSACHUSETTS INVESTIGATING SUBCOMMITTEE:

13 Friend Court
Wenham, Massachusetts

SUBJECT: UFO REPORT (22 April 1966; Beverly, Massachusetts)

DATE: 6 May 1966

FROM: Raymond E. Fowler
Chairman: NICAP MASS SUBCOM

TO: NICAP, Washington, D.C.

ATTN/FROM: Richard Hall
Assistant Director

cc: APSC-PTD (Project Bluebook)
Congressman: W. H. Bates

Enclosed is a detailed report covering the sighting of three UFOs at Beverly, Massachusetts on 22 April 1966.

This sighting is similar to the April 18, 19 Sharon, Massachusetts sighting(s) in that it involves 3 UFOs, multiple civilian witnesses and two members of the Beverly Police Department who also witnessed one of the UFOs.

Enclosed as part of this report are signed statements and forms by both police officers. They got a good look at the object as it hovered directly over the Beverly High School and told me they were certain that it was not an airplane or helicopter. Three adult witnesses were "buzzed" by the UFO earlier. It appeared to be hovering about twenty feet above their heads. Other adults called on the scene also witnessed the UFOs. It is indeed fortunate that police officers were called on the scene to investigate and confirm these sightings.

Respectfully submitted,

Raymond E. Fowler
Chairman: NICAP MASS SUBCOM

BEVERLY, MASS. UFO SIGHTING SUMMARY SHEET (1)

UFO Report - 4/22/66

BASIC DATA

DATE: 22 April 1966 TIME: ± 9:00 - ± 10:00 PM EST

PLACE: Beverly, Massachusetts

Group 1 - 63 Sohier Road,

Group 2 - Field behind Beverly High School bordering Murrick Streets and Salem Road

Group 3 - Corner of Merrick Street and Salem Road at Guard Rail

Group 4 - 7 Brenahan Court

Group 5 - Same as Group 3 and in back yard of Beverly High School

SIGHTING BACKGROUND

I received a telephone call from Mrs. Claire Meduano, 63 Sohier Road, Beverly, Massachusetts on Saturday afternoon, 4-23-66, who told me what many people had witnessed 3 UFOs over the Beverly High School that Friday night. She stated that 2 Beverly Police Officers called on the scene also witnessed one of the objects but when she phoned the police today that they would not admit any officers were involved.

I phoned the police and was told that there was no such report on the blotter except an earlier report on a fire-ball. I asked who was on duty during the sighting period and obtained the names of 2 pairs of officers who were out on patrol at that time. I phoned and eliminated the first pair narrowing it down to Officers Bossie and Mahon. I phoned them and although they hedged my questions at first, finally admitted that they saw something and agreed to be interviewed.

On the following day, Sunday, 24 April 1966, I interviewed the civilians having them fill out the standard NICAP UFO Report forms and sign them. I then proceeded to Beverly Police Headquarters. At the station I was given the run-around at first but after pointing out that I had been given cooperation by other police departments and that Officers Bossie and Mahon had agreed to be interviewed, the officer in charge ordered the desk sergeant to radio both officers in. Upon arrival they were told to tell me exactly what they witnessed. We were ushered to a private room and I interrogated them for about an hour. They filled out and signed NICAP UFO Report forms and wrote and signed brief statements regarding the sighting.

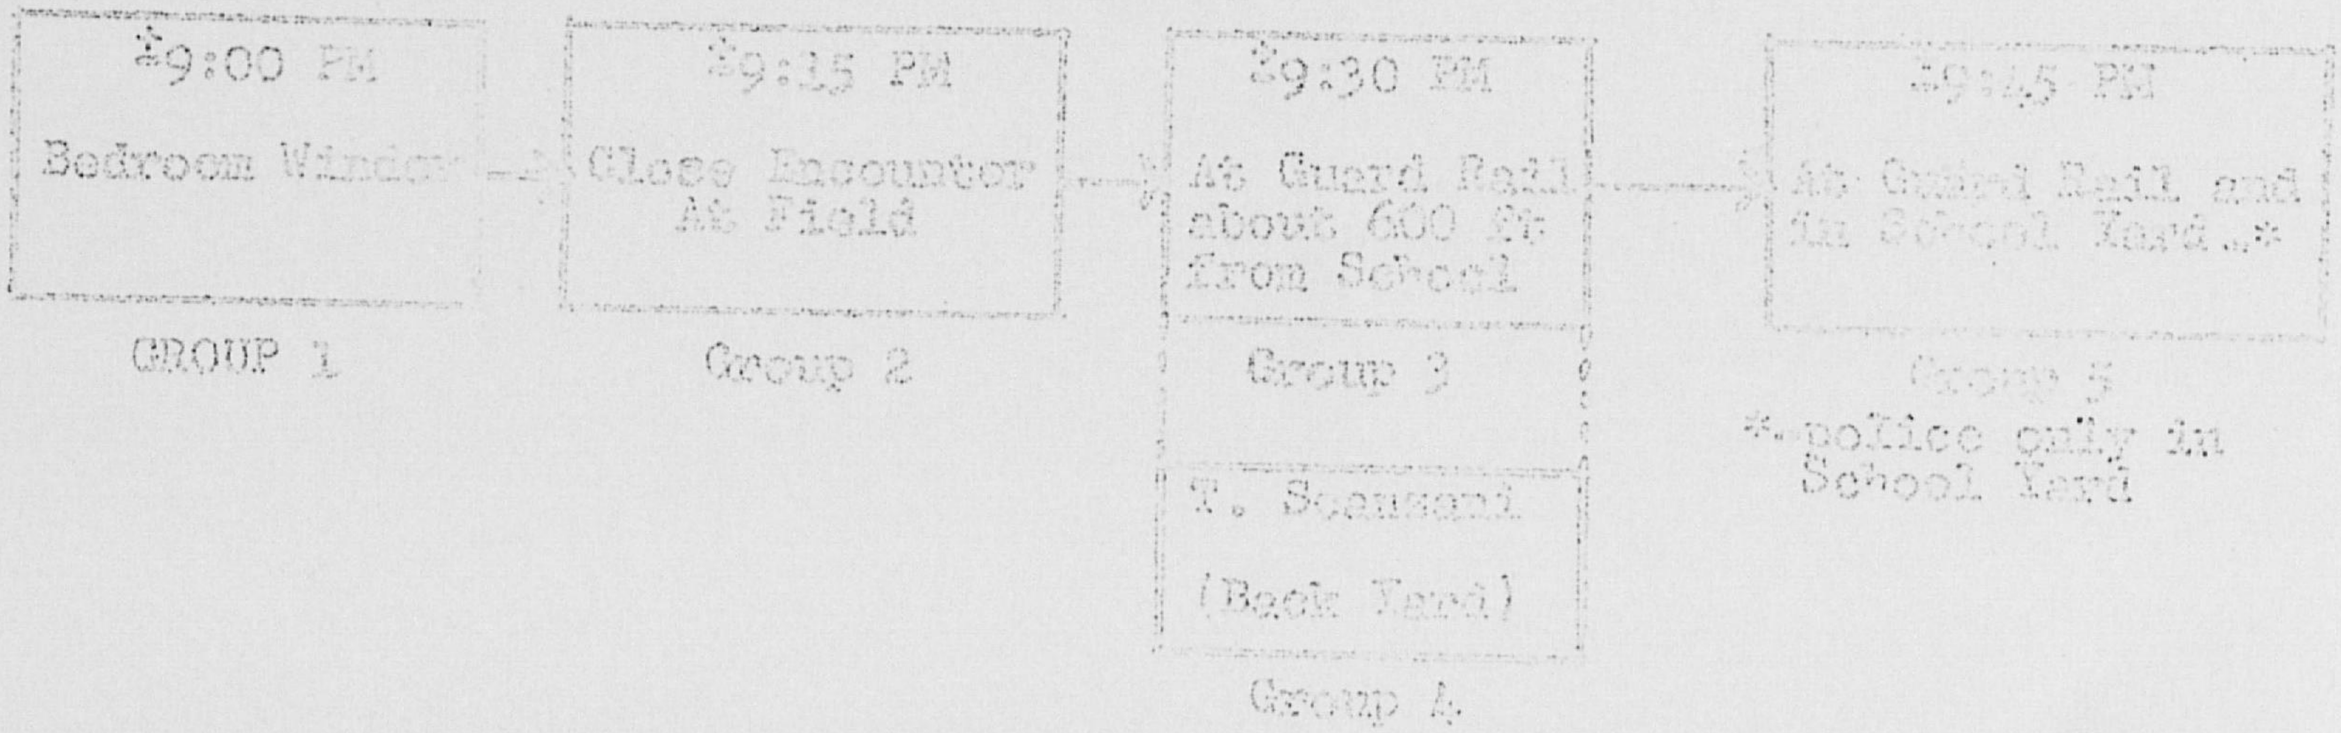
BLOCK DIAGRAM (Event Sequence)



BEVERLY, MASS. UFO SIGHTING SUMMARY SHEET (3)

UFO Report - 4/22/66

SIGHTING ACCOUNT

The sighting started about 9:00 PM EST when Nancy Modugno, age 11, noticed a blinking light shining through her window as she lay in bed. She looked out the window (WNW) and saw a football-shaped object the size of an automobile flashing blue, green, red, and soft white lights. It made a soft "whizzing sound" as it passed along Sohier Road, at first seemingly only 40 feet away. It seemed to be right over the houses on the other side of the road. It then passed behind some trees about 50 feet away (trees estimated 40-50 feet high) heading N toward a large field behind the Beverly High School. The lights seen through the trees seemed to indicate that it was landing in the field.

Nancy was terrified and ran downstairs to tell her father, Angelo Modugno, who was watching TV. His wife, Claire Modugno was in the adjoining apartment next door visiting Barbara Smith with Brenda Maria. Barbara and Brenda left Claire and came over to use her telephone to order pizza pie. When they came in they found Nancy in a hysterical condition and her father, Angelo, trying to calm her down. They tried to calm Nancy by telling her that what she saw was probably an airplane. They looked out the window toward the field and saw some flashing lights and told Nancy they would walk down to the field and prove that they were from an airplane to reassure her.

They all went next door and got Claire and Barbara, Brenda and Claire went down Sohier Road to Norwich Street and down into the field. They sighted 3 brilliantly lit objects flying in a circular pattern. The objects would circle and hover and then proceed to circle. One was over the High School, one to its left more distant and higher and another to the right, also more distant and seemingly over where the Banao Research Buildings would be off Route 128. They only hovered momentarily and then started the circular motion again at great speed. The witnesses said they look as if they were playing tag". Brenda, half in fun, began waving her arms motioning them toward them. While watching one that was completing a circle over the school it started to come toward them. Barbara and Claire began running back to Norwich Street, while Brenda, momentarily unaware that they were no longer standing behind her, was shouting that it was going to pass right over them. At this point, Barbara and Claire stopped and looked around to see the object hovering about 20 feet over Brenda who was screaming and covering her head with her hands. (She thought it was going to attack her!) Brenda, suddenly realizing that Barbara and Claire were not with her, began running to them. Looking back they saw the object hovering and then moving back toward the High School in a semi-circular pattern. As they ran along Norwich Street they could see it over the school.

The trio ran to Claire's house and phoned Mr. and Mrs. Robert Lesser and Mrs. Theresa Scannell. The Lesser's came right over. Theresa could not leave the house. (She says she saw one of the objects pass over her home as she watched for them from her backyard). Then, Barbara, Brenda, Claire, Angelo, Nancy, and Mr. and Mrs. Lesser all ran down to the corner of Norwich Street and Sohier Road where there is a guard rail overlooking the field." Two UFOs with the same changing colored lights were hovering at a high altitude at a good distance. They looked a little larger than stars but the lights were brilliant. One UFO was

seemingly hovering directly over the High School and looked as if it were only 15 - 30 feet above the roof. It was oval shaped and flashing a very bright Red light along with dimmer Green and White lights. Mr. Lesser ran back home and phoned the Beverly Police station.

Officers Dennis Bossio and John Mihon arrived on the scene shortly in a cruiser and jokingly enquired - "Where's the airplane?" - The group excitedly pointed the object out to them as it circled slowly over the school at very low level. Both officers were visibly shaken. They watched a few minutes and then got into the cruiser and sped down Salem Road and into the backyard of the High School. As they came into the school yard, the object moved off slowly into the SW toward the United Shoe Machinery Corporation and disappeared from view. No one saw what the other two objects disappeared because they were so attentive to the closer one.

One of the things that amazed all the witnesses was the fact, that except during Nancy's initial sighting, the objects made no noise whatsoever. Brenda told me that even when the object was directly over her she heard no noise, not even the air seemed to be disturbed. All are familiar with airplanes and helicopters. Soon after the sighting both civilians and police saw and heard the airplanes and a helicopter near the area. Their running lights were nothing like the lights on the UFOs.

PERSONAL STATEMENTS/REACTIONS

NANCY MODUCNO - "The object had four lights, red-blue-green and a lamp color. It looked like a football but was the size of a car. On the top it had no windows. The front was pointed. I was terrified."

BARBARA SMITH - "The first time I saw the object was from a window. It was just a flashing red light that moved slowly along the sky, then behind some trees and was lost from view." The next time I saw the object there were 3. They were flying in a circular pattern. Then they just seemed to stop and hang for a few seconds, then they would move with great speed. While watching one that was completing a circle, it started to come toward us." (with Brenda & Claire, Group 2) I started to run. Then a friend (Brenda) called - "look up it is directly over us" - so I looked up and stood still in surprise. I saw a large round object just roof-top level. It was just like looking at the bottom of a plate. It was solid. I saw no flashing lights as I did when they were farther away but I did see a halo-like light that went across the front. The color (of the object) was a greyish-white. I heard no sound at all but I felt this thing was going to come down on top of me. (It was like) a giant mushroom. I was fascinated, stunned, unable to think and automatically found myself running away from it.

UFO Report - 4/22/66

BRENDA MARIA - "This object appeared larger and larger as it came closer. The lights appeared to be all around and" turning. The colors were very bright. (When overhead) - All I could see above my head was a blurry atmosphere and brightly lit-up lights flashing (not blinking slowly around. I was very very excited - not scared - very curious. I would not have ran at all" except for the fact" the object got too close and I thought it might crash on my head."

CLAIRE MODUGNO - "It came right toward me - looked very brilliant. It was greyish - seemed very smooth and seemed to take on the" Red and also the Green from the very brilliant lights. I was terribly scared."

(Note: Claire was so frightened as she ran from the object She illustrated. This was disclosed to me by the others during the interview much to the embarrassment of Claire!)

OFFICER BOSSIE - "On April 22, 1966 at 9:45 PM I was" sent by the station to Salem Road near Beverly High School on a report of a UFO. We arrived and were met by a dozen or so people who were all excited on seeing objects." I saw an oval red object just ahead of me. The lights were bright and were blinking all the time. I heard no noise and the object seemed to stay at the same height and just move away very smoothly. It headed toward the United Shoe Machinery Corp. and in the area of the Airport."

OFFICER MAHON - "At 9:45 PM on orders from the station, I went with Officer" Bossie to Salem Road, site of the Beverly High School on a report of a UFO. On arrival I observed what seemed to me to be like a LARGE PLANE HOVERING OVER THE SCHOOL. It had three lights - Red, Green & White but" no noise was heard to indicate it to be a plane. This object hovered over the school and appeared to almost" stop". The lights were flashing. The object went over the school about two times and then went away."

SPECIAL POINTS OF INTEREST

1. During Nancy's initial sighting, Angelo Modugno said lines appeared on the TV screen obliterating the picture momentarily.

2. The U.S. Coast Guard informed" me that they received no UFO Reports during the sighting period nor was their helicopter airborne.

3. The Sky-Lite Advertising was flying in the Salem, Derry, Manchester, New Hampshire area between 9:00 and 10:00 PM according to manager Joseph Bodina so his plane is ruled out.

UFO Report - 4/22/66

U.S. WEATHER REPORT
CLIMATOLOGICAL SECTION
LOGAN AIRPORT, BOSTON

DATE: 22 April 1966
TIME: 9:00 - 10:00 PM EST
VISIBILITY: EXCELLENT (15 Miles)
CEILING: High Thin Scattered Clouds above 20,000 feet
WIND:
Direction: SOUTH
Speed : 7 MPH

EVALUATION:

The witnesses were mature and sincere. They were not seeking publicity. I encountered the usual problems when interviewing them, such as their not understanding some of the questions and filling them out wrongly; some of them had seen the object at different time periods and places which confused them; directions and times were approximate; etc. I had to telephone them to get some of the details straight. The data extracted from the UFO Report Sheets and from personal conversations is substantially accurate.

The description of the UFO is similar to other reports being received and follows the characteristics of the true UFO. I hope to go back into the area and check out rumours of other witnesses. I did go back and take compass readings and photographs. I also hope to get tape recordings of the witnesses description of the UFO at close range.

All witnesses are very familiar with the conventional running lights, configuration and noise of convential airplanes and helicopters. Many aircraft flying into Logan Airport and Beverly Airport are witnessed by them daily. Two airplanes and a helicopter were witnessed over the area shortly after the UFOs disappeared and were easily recognized. The close-up encounter by Brenda, Barbara and Claire ruled out known aircraft. The other civilians and the two police officers were convinced that what they witnessed was not conventional aircraft. The object(s) were round, solid, carried rotating red, green, white and blue lights. The one sighted at close range looked like it was constructed of dull grey metal. They were noiseless. My own opinion is that this sighting represents a good unknown.

ADDENDUM: (Mrs. Robert Losper watched the area until after midnight and observed the following at 12:15 AM, 23 April 1966)

"Just one object appeared over the High School. It was mostly white. When it was about to stop it turned green. When it stopped it was white like a star. It went around the same circle 3 times and stopped 3 times in the same spot (over school). Then it went away heading north."

Respectfully submitted,

Raymond E. Fowler

Raymond E. Fowler, Investigator
Chairman: NICAP Mass SUBCOM

April 22, 1966

On April 22, 1966 at 9:45 P.M. I received by station to Salem Rd. near Beverly High School on report of U.F.O. I arrived and met 4 a dozen or so people who were all excited on seeing object. I saw a oval red object just ahead of me. The lights were bright and were blinking all the time. I heard no sound and the object seemed to stay at the same height and just move very smoothly. It headed towards the E.S.S.M.A. Co. and in the area of the airport.

Dennis A. Bossie

BRIEF STATEMENT
OFFICER DENNIS BOSSIE
BEVERLY POLICE DEPT, MASS.

BRIEF STATEMENT
OFFICER JOHN MAHON
BEVERLY POLICE DEPT, MASS.

At [illegible] with [illegible] Beverly High School on the [illegible] U.F.O.

On arrival I heard [illegible] might be like a large [illegible] over the school. It had [illegible] red, green & white, but no [illegible] heard to indicate it to [illegible]. The object hovered over the school & appeared to almost stop. The lights were flashing. The object [illegible] the school about two [illegible] went away.

Respectfully [illegible]
John Mahon

REPORT ON UNIDENTIFIED FLYING OBJECT(S)

This form includes questions asked by the United States Air Force and by other Armed Forces' investigating agencies, and additional questions to which answers are needed for full evaluation by NICAP.

After all the information has been fully studied, the conclusion of our Evaluation Panel will be published by NICAP in its regularly issued magazine or in another publication. Please try to answer as many questions as possible. Should you need additional room, please use another sheet of paper. Please print or typewrite. Your assistance is of great value and is genuinely appreciated. Thank you.

1. Name Dennis N Bossie

Address 34 Longmeadow RD

Telephone WA-26927

Place of Employment City of Beverly

Occupation Police Off.

Education High School

Special Training

Military Service None

2. Date of Observation 4-22-66 Time AM 9:45 PM Time Zone

3. Locality of Observation ~~Essex~~ Beverly Hill

4. How long did you see the object? Hours 3 Minutes Seconds

5. Please describe weather conditions and the type of sky; i.e., bright daylight, nighttime, dusk, etc.

6. Position of the Sun or Moon in relation to the object and to you.

7. If seen at night, twilight, or dawn, were the stars or moon visible?

8. Were there more than one object? No If so, please tell how many, and draw a sketch of what you saw, indicating direction of movement, if any.

9. Please describe the object(s) in detail. For instance, did it (they) appear solid, or only as a source of light; was it revolving, etc? Please use additional sheets of paper, if necessary. Looked round and solid Red lights going off and on It seemed to hover.

10. Was the object(s) brighter than the background of the sky?

11. If so, compare the brightness with the Sun, Moon, headlights, etc.

12. Did the object(s) — (Please elaborate, if you can give details.)

Object going in a circular motion

a. Appear to stand still at any time?
b. Suddenly speed up and rush away at any time?
c. Break up into parts or explode?
d. Give off smoke?
e. Leave any visible trail?
f. Drop anything?
g. Change brightness?
h. Change shape?
i. Change color?

13. Did the object(s) at any time pass in front of, or behind of, anything? If so, please elaborate giving distance, size, etc, if possible.

14. Was there any wind? No If so, please give direction and speed.

15. Did you observe the object(s) through an optical instrument or other aid, windshield, windowpane, storm window, screening, etc? What?

16. Did the object(s) have any sound? No What kind? How loud?

17. Please tell if the object(s) was (~~were~~) —

a. Fuzzy or blurred.
b. Like a bright star. ✓
c. Sharply outlined.

18. Was the object —

a. Self-luminous? ✓
b. Dull finish?
c. Reflecting?
d. Transparent?

19. Did the object(s) rise or fall while in motion? Kept same height

20. Tell the apparent size of the object(s) when compared with the following held at arm's length:

a.	Pinhead	d.	Nickel	g.	Orange
b.	Pea	e.	Half dollar	h.	Grapefruit
c.	Dime	f.	Silver dollar	i.	Larger ✓

Or, if easier, give apparent size in inches on a ruler held at arm's length.

21. How did you happen to notice the object(s)? Person stood out direction where they came at

22. Where were you and what were you doing at the time? called to Jane area.

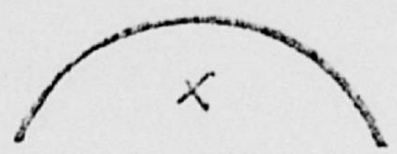
23. How did the object(s) disappear from view? Just moved away slowly

24. Compare the speed of the object(s) with a piston or jet aircraft at the same apparent altitude.

25. Were there any conventional aircraft in the location at the time or immediately afterwards? If so, please elaborate. 1 plane

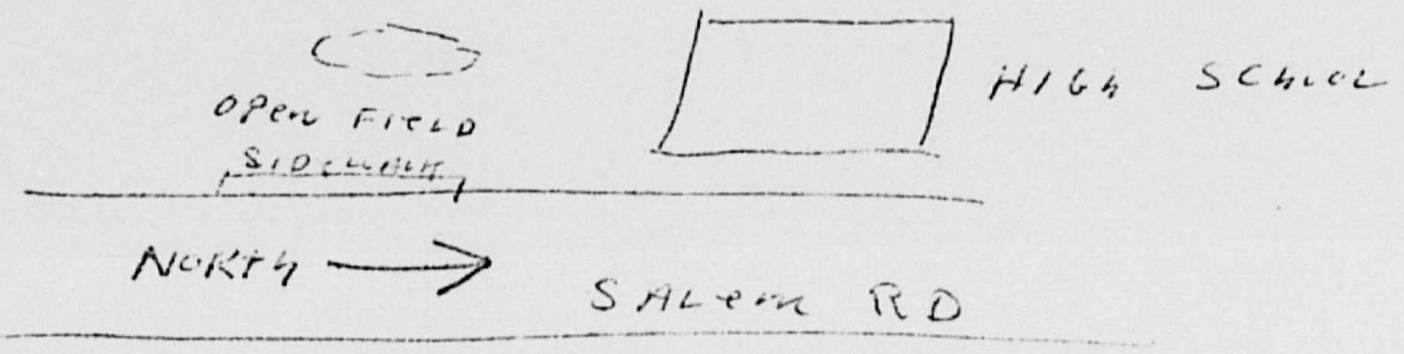
26. Please estimate the distance of the object(s).

27. What was the elevation of the object(s) in the sky? Please mark on this hemisphere sketch:



28. Names and addresses of other witnesses, if any. John Morton Beverly Police

29. Please draw a map of the locality of the observation showing North; your position; the direction from which the object(s) appeared and disappeared from view; the direction of its course over the area; roads, towns, villages, railroads, and other landmarks within a mile.



30. Is there an airport, military, governmental, or research installation in the area? Yes, Bomac, U.S.M.C Airport

31. Have you seen other objects of an unidentified nature? If so, please describe these observations, using a separate sheet of paper. Yes

32. Please enclose photographs, motion pictures, news clippings, notes of radio or television programs (include time, station and date, if possible) regarding this or similar observations, or any other background material. We will return the material to you.

33. Were you interrogated by Air Force investigators? By any other federal, state, county, or local officials? If so, please state the name and rank or title of the agent, his office, and details as to where and when the questioning took place.

Were you asked or told not to reveal or discuss the incident? If so, were any reasons or official orders mentioned? Please elaborate carefully.

34. We should like permission to quote your name in connection with this report. This action will encourage other responsible citizens to report similar observations to NICAP. However, if you prefer, we will keep your name confidential. Please note your choice by checking the proper statement below. In any case, please fill in all parts of the form, for our own confidential files. Thank you for your cooperation.

4. How long did you see the object? Hours 3 Minutes Seconds

5. Please describe weather conditions and the type of sky; i.e., bright daylight, nighttime, dusk, etc. fair, cloudy

6. Position of the Sun or Moon in relation to the object and to you.

7. If seen at night, twilight, or dawn, were the stars or moon visible? yes

8. Were there more than one object? No If so, please tell how many, and draw a sketch of what you saw, indicating direction of movement, if any.

9. Please describe the object(s) in detail. For instance, did it (they) appear solid, or only as a source of light; was it revolving, etc? Please use additional sheets of paper, if necessary. It appeared solid, it was revolving.

10. Was the object(s) brighter than the background of the sky?

11. If so, compare the brightness with the Sun, Moon, headlights, etc.

12. Did the object(s) — (Please elaborate, if you can give details.)

    a. Appear to stand still at any time? appeared to slow down, then pick up speed
    b. Suddenly speed up and rush away at any time?
    c. Break up into parts or explode?
    d. Give off smoke?
    e. Leave any visible trail?
    f. Drop anything?
    g. Change brightness? yes brighter as it go closer
    h. Change shape?
    i. Change color? yes appeared to have red, white, & green lights

13. Did the object(s) at any time pass in front of, or behind of, anything? If so, please elaborate giving distance, size, etc, if possible.

14. Was there any wind? If so, please give direction and speed.

15. Did you observe the object(s) through an optical instrument or other aid, windshield, windowpane, storm window, screening, etc? No What?

16. Did the object(s) have any sound? No What kind? How loud?

17. Please tell if the object(s) was (were) —

    a. Fuzzy or blurred.
    b. Like a bright star.
    c. Sharply outlined.

18. Was the object —

a. Self-luminous?
b. Dull finish?
c. Reflecting?
d. Transparent?

19. Did the object(s) rise or fall while in motion? N/A

20. Tell the apparent size of the object(s) when compared with the following held at arm's length:

a.	Pinhead	d.	Nickel	g.	Orange
b.	Pea	e.	Half dollar	h.	Grapefruit
c.	Dime	f.	Silver dollar	i.	Larger N/A

Or, if easier, give apparent size in inches on a ruler held at arm's length.

21. How did you happen to notice the object(s)? Looked out from Police Station

22. Where were you and what were you doing at the time? Normal patrol duty

23. How did the object(s) disappear from view? Circled over the school; then pilot headed away & disappeared

24. Compare the speed of the object(s) with a piston or jet aircraft at the same apparent altitude.

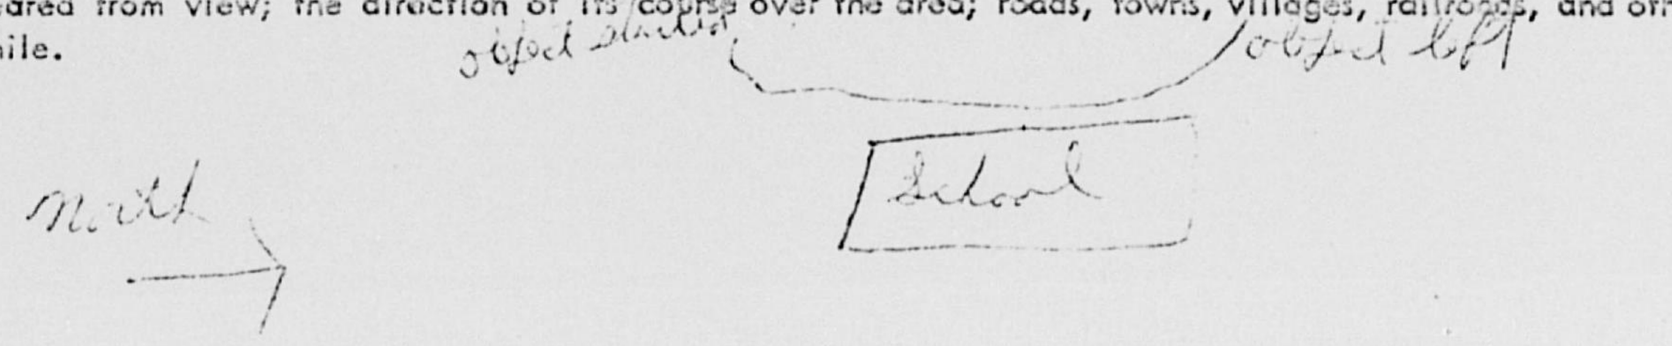
25. Were there any conventional aircraft in the location at the time or immediately afterwards? If so, please elaborate. No. There was a plane, but came in the area shortly after the object left.

26. Please estimate the distance of the object(s).

27. What was the elevation of the object(s) in the sky? Please mark on this hemisphere sketch:

28. Names and addresses of other witnesses, if any.

29. Please draw a map of the locality of the observation showing North; your position; the direction from which the object(s) appeared and disappeared from view; the direction of its course over the area; roads, towns, villages, railroads, and other landmarks within a mile.



30. Is there an airport, military, governmental, or research installation in the area? Private, small, airport

31. Have you seen other objects of an unidentified nature? If so, please describe these observations, using a separate sheet of paper. No

32. Please enclose photographs, motion pictures, news clippings, notes of radio or television programs (include time, station and date, if possible) regarding this or similar observations, or any other background material. We will return the material to you.

33. Were you interrogated by Air Force investigators? By any other federal, state, county, or local officials? If so, please state the name and rank or title of the agent, his office, and details as to where and when the questioning took place. No

SAFOICC/Mrs Cassel/jad/79079/8 May 67

MAY 8 1967

Dear Mr [redacted]

This replies to your letter reporting the April 22 unidentified flying object (UFO) sighted by you and your friends.

However, without essential data such as angular velocity, flight characteristics, duration of the sighting, etc., a comprehensive evaluation cannot be undertaken. Also you neglected to mention the time and location of your sighting. I don't know what it was you saw -- I believe you observed something which did not appear familiar to you. We define a UFO as any aerial phenomenon or object which is unknown or appears out of the ordinary to the observer. Your observation will be filed for information purposes.

Thank you for your letter; we appreciate your interest in our program. I have attached some reading material which I think you will find interesting.

Sincerely,

GEORGE P. FREEMAN, JR.
Lt Colonel, USAF
Chief, Civil Branch
Community Relations Division

Project Blue Book Information off.
Safoi
Washington, D.C. 20330.

Dear Sirs.

I am very intrested in the sightings of these U.F.O.s, and I would be very thankful if you could send me some information and a couple of pictures, if you have any. on some recent sightings.

On saturday April 22 a few friends and me were look for falling stars, when we noticed a bright object in the sky, it looked like an plane landing lights but

they kept on turning bright
and dim. When it came closer
there was a red light behind
the white, then suddenly
it made very sharp turn
and then there was a white
light and a blue one behind
it then suddenly disappeard
behind the trees. When it
rose agin the blue light
seemed to flip over the
white light, after that we
didnt see it any more.

I wish that you could
send a reply about this object.

Yours truly

[redacted]

PS the object didnt make any
noise at all

14. APPROVING AUTHORITY:

RECD 80-3 15 MAY 1967

15. SUMMARY:

1. This report forwards a narrative written and signed by [redacted] and concerns his sighting of UFO's 23 April 1967. It should be noted report is submitted as an IR since AFR 80-17 is not available this station.

(Leave Blank)

COMMENTS OF REPORTING OFFICER: a. On query, Sr. [redacted]s described his portrayal of the zig-zag area (on attached drawing) as representing his conception of the total path of one object which changed direction in rapid succession, producing an explosion or brilliant flash at each change of direction. He thought also that the phenomenon he observed might have had some sort of connection with SOYUZ I which was reported to have crashed 24 April.

b. Source became visibly agitated and excited while recounting the story. He mentioned also that his children were pulling at his elbow to use the binoculars as the two objects he described approached one anot her. Therefore, he was unable to state whether an actual collision took place or what might have transpired. He knows of no one else besides himself and family who might have seen the objects.

c. This report has been delayed in submission to try to ascertain whether there were other observers. No other observers have been located and no local publicity has been generated on the subject. Source is a responsible citizen, a florist in MIXCO (1439N/090 36W), a small town about 5 miles West of Guatemala City near the Pan American highway. It should be noted Source came in of his own accord after requesting an appointment by phone. He first reported to the MILGP and was referred to DATT/AirA. He was firm about not wanting any publicity as he did not wish to appear foolish or overly imaginative. His desire was simply to report the incident. RO feels he seemed believable; there was no joking about the subject and there is not doubt in mind of RO that Source saw something which was to him unnatural or at the very least highly unusual.

TRANSLATION OF WRITTEN NARRATIVE BY [redacted]

Memorandum Concerning Phenomenon Observed Sunday, 23 April 1967 At Approximately 8:00 P. M.

At approximately the hour indicated above, my wife was watering the flowers in the window boxes of our house; I was near a bedroom window which she had left open. She asked me to close the window and when I approached it I was surprised to see the sky so clear and full of stars. At this moment I noticed a star of surprising magnitude; my surprise was even greater when I observed it was moving from the Southwest to the Northeast. Its size was greater than Venus in its most visible periods. I called to my children and to my wife; they saw the star (as we will call the object) which was moving and had a very intense brilliance, with no change of color, giving off a clear yellow light with uniform rays. We ran out to the fields near our house and I carried binoculars (Zeiss) which are very powerful.

As I leaned on a fence to control my nerves, I called out to my children that I saw a star of a dull red color, without the rays which normally appear around a star; it was moving toward the star which had first interested us. At first I thought it was an optical illusion since the other star was also moving in the same direction, but, on training the binoculars on the red star, I noticed it was increasing in size and therefore must be moving. I called out to my children to look at the second star but found it was not visible to the eye and it was also being covered by a cloud. The two stars rapidly approached each other; both appeared to be at the same altitude or height on horizon but the red star was moving faster. On looking again at the area I could only see the large star which had somewhat changed its direction, moving more to the North. (Larger star is the yellow star.) I realized this change of direction later; I did not stop to think about it at the time but when I was reconstructing my observations I remembered it. I did note at the time that the larger star was moving more rapidly but without losing brilliance, and while I was observing it there was no change of color or any flashes.

The drawing attached shows the larger star at the moment I saw multiple red lines moving from one side to the other, making a kind of zig-zag and, at the end of some of these lines, what appeared to be small rays, completely rectilinear, forming small stars of enormous brilliance. The lines were red and the small stars formed at the end of the lines were of a very brilliant clear red color. At this moment the clouds lifted and my wife could see the multiple lights or stars that formed.

In summary, this phenomenon seemed to come from one object which moved rapidly from one place to another, leaving behind a red line which faded out with a sort of flash; it was not like the explosions of fireworks in which there are a number of rocket flashes at the same time.

I believe that the two objects crashed together but, unfortunately, I let my children use the binoculars and tried to direct their vision toward the two stars; also, the observation took place during some 80 seconds so there was no time. I do know that the larger star was already somewhat out of the zone where I saw the explosions when they appeared. It could be that there was some delay in finding the area when my children returned the binoculars, but when I again located it, it was difficult to find as it was moving fast and had somewhat changed its trajectory. Signed:
J. R. CARLOS C.
